The Ultimate Document Camera P100

P100 Quality — Broadening the Potential of Communication

Not only for teaching and presentations, the ELMO Visual Presenter P100 goes further by featuring advanced technologies and concepts to enhance a wide range of communications. It's the perfect presentation tool, allowing users to easily break through the constraints and obstacles that previously seemed to hamper communication. And it's easier to understand, easier to use, and best of all, it gives you more power to communicate. Everything about it was developed with the goal of transforming communication for the better. It is certain to evoke an unprecedented, gratifying response from your audience, giving you a well-deserved sense of satisfaction.

For telling your story better. For communicating your message.

Quick setup facilitates a smooth start, enhancing the communication of your message.

With only one action, camera and light are ready. In most cases, the quality of your presentation depends on whether you get off to a good start or a bad start. The P100 helps you to get your presentation off to a skilled, effortless start. Moreover, you can fold it up right away thanks to its compact size. That means you can put it away without hassle right in the middle of your teaching or presentation or when you're finished.

When the speaker stops speaking, the audience stops thinking. Simple design for easy operation

All the functions that you use frequently, like zoom, autofocus, and Input selection, are concentrated conveniently at your right hand. You can deliver your message effectively without interrupting its flow because the P100's buttons and dials are in plain view, even if you have reference materials at hand on stage. This means that you can proceed without interrupting the concentration of your audience. This is true ingenuity – the big difference in enhancing the quality of your communication.

Enhancing your power of persuasion by facing your audience Integrated LCD Monitor

On top of everything else, you have a built-in 3.5" LCD monitor at your right. Viewable from most angles, it allows you to straighten out the position of your materials immediately. You don't have to turn around to look at the image on the screen behind you. This means you can proceed smoothly while facing your audience, thus boosting the concentration of your audience as well as your persuasiveness.

The truly important things are often in the details. Advanced 64x zoom (16x optical zoom and 4x digital zoom)

To display all materials with maximum clarity, ELMO insisted on high magnification optical zoom in particular. Our 64x zoom will become the industry standard. It will faithfully display in high resolution the details of a wide range of books and texts as well as three-dimensional objects and special materials such as slide films. Moreover, it can display subjects of very small sizes without distorting their image. It can handle almost any kind of material without hassle. This paves the way to remarkable improvements in communication speed and understand, thus broadening the reach of teaching and meetings. Of course, it also is equipped with One-Push Autofocus. It automatically, instantly, and smoothly determines and sets the right focus for a wide range of subjects.

Approx. 1,300,000 pixels, yielding both high resolution and understanding CMOS Image Sensor

You need convincing high image quality to deal with people who are used to high-quality TV and PC display performance. ELMO has been working constantly on developing what you need, focusing on the key elements that determine image quality. With the P100, you can display vivid images clearly without hassle in a wide range of presentations, thanks to its horizontal resolution of 800 lines, meeting the highest industry standard, and its highly precise 1,350,000 pixels CMOS image sensor. Moreover, it produces beautiful, homogeneous images without any unevenness because of its exclusively designed lens with minimum light falloff at edges and distortion. The P100, featuring proper and precise display performance, enabling speakers to teach and make presentations with the utmost confidence.

message better. ELMO Visual Presenter P100

High image quality enhances the quality of communication 30 Frames Per Second Technology

Stroboscopic effects produced when the zoom adjusts itself, the subject is moved, and afterimages produced when the subject is changed are caused by the small number of frames per second (images per second). This is why the P100 achieves 30 frames per second. By facilitating smooth, natural movements, this helps the audience to continue concentrating its attention on the speaker.

USB 2.0 terminals, linking the P100 with PCs, facilitate more effective communication.

You can deliver your message more effectively, thanks to its drawing function, which allows you to enter lines and letters that show key parts from the PC in the still images captured to PC from P100. At the same time, there is a screen separation function that can display a wide range of information.

All you need is one card to start with Accommodates SD cards

If you store your images in an SD card (sold separately), you can teach and make presentations using slide shows stored in the card, without bringing along PCs and other hardware.

Flexible Free-Arm Function broadens the reach of teaching and presentations

You can photograph the points of the subject that you want to emphasize from any angle. You also can project things that need to be shown from the side, like beakers with liquids, and three-dimensional objects from effective angles. By fixing the arm at the most suitable location, including photography from locations lower than usual, you can produce a wider range of more effective presentations. And this broadens your repertoire of communication techniques.

Clear Text Mode, to accent image quality by clear contrast

Many textual subjects are monochrome manuscripts. The P100 is equipped with a text mode to accentuate the contrast between black and white. It facilitates clear reading of small text through its capability to clearly reproduce letters. If the text of a document is hard to see, it is difficult to convey the main points. With the P100, you don't need to worry about images of texts hampering effective communication.

Accommodates High Definition TV, complying with the diversifying high image quality of output devices

The display does not become oblong, even with 16:9 high definition TV monitors, thanks to its HDTV output of 1280x720 dots. The P100 supports progressive scan so flickering and blurring does not occur on the screen. As such, it is a communications tool that is very useful in a wide range of situations.

■ P100 Specifications

Model	P100	
Camera	Image pick-up device	1/3" CMOS, Approx. 1,350,000 pixels
	Total pixels	1312 (H) x 1032 (V)
	Effective pixels	1280 (H) x 1024 (V)
	HD/TV 720p output	1280 (H) x 720 (V)
	XGA output	1280 (H) x 960 (V)
Optics	Frame rate	30 frames/sec.
	Resolution	800 (H) x 800 (V) TV lines or more
	Video output	450 (H) TV lines or more
	Zoom	16x optical, 4x digital
	Lens	F2.7, f = 4.9 ~ 78.4mm
Shooting area	SXGA output	Max. 405 x 324mm Min. 30 x 24mm
	HDTV output	Max. 405 x 224mm Min. 30 x 17mm
	XGA output	Max. 405 x 303mm Min. 30 x 23mm
	Limit of focus adjustment	TELE : 250 ~ 410mm, WIDE : 85 ~ 410mm from close-up lens
	without Close-up lens	TELE : 500mm ~ ∞, WIDE : 100mm ~ ∞ from zoom lens
Focus	Focus	Auto/Manual (powered)
	Iris	Auto (with level adjustment) / Manual
	White balance	Full-auto/One-push/Manual
	Negative/Positive conversion	Provided
	Color/B&W selection	Provided
Gamma adjustment	Gamma adjustment	Provided (at GRAPHICS mode only)
	Pause mode	Provided
	Image rotation	Provided (0°, 180°, Automatic rotation by 180° for forward shooting)
	Image mode	TEXT1 / TEXT2 / TEXT3 / GRAPHICS
	State presetting	Provided (Up to 8 user settings)
Edge enhancement	Edge enhancement	Provided (at GRAPHICS mode only)
	Drawing function	Provided (on PC screen)
	Screen separation	Provided (on PC screen : Live image+Saved image)
	Image save	Provided (onto SD memory card)
	Split display	Provided (SD memory card image, 9-splits, 16-splits)
Slide show	Slide show	Provided (SD memory card image)
	Sync. system	Internal
	Input selection	Int. / RGB
	DVI output	TMD5 data signal 0.5V (p-p) 50Ω terminated
	Analog RGB output	0.7V (p-p) 75Ω unbalanced
Composite video output	Sync. signal: SXGA	positive polarity
	HDTV	negative polarity
	XGA	negative polarity
	Compliant with PAL / NTSC	
	Video output selection	Provided (PAL / NTSC)
Video output size	Video output size	Over scan / Under scan
	Input terminal	RGB input: Mini Dsub 15P connector, female x1
	DVI output	DVI-D 24P connector, female x1
	RGB output	Mini Dsub 15P connector, female x1
	Composite video output	RCA pin jack / 75Ω unbalanced (PAL / NTSC) x1
Dsub 9P connector, male	Dsub 9P connector, male	
	USB 2.0 port	Type B receptacle
	SD Memory Card slot	Provided
	Upper lighting unit	Twin fluorescent lamp
	Base lighting unit	Cold-cathode tube
Supplied Accessories	Supplied Accessories	AC adapter, Power cord (1.5m), Video RCA cable (3m), Analog RGB cable (Dsub 15P connector) (2m), DVI cable (2m), I/R remote control, Batteries (Type R03, AAA), Instruction manual, USB cable (1.8m), Warranty card, Installation manual for Utility Software, Utility Software CD-ROM
	I/R remote control	Provided
	Application software	Image Mate for Presentation, TWAIN driver [Windows 2000 (SP4 or later) / Windows XP (SP2 or later)]
	Storage mode	Provided [Windows 2000 (SP4 or later) / Windows XP (SP2 or later)]
	Built-in 3.5" LCD preview monitor	Provided
Dimensions (W x D x H)	Set up	457 x 519 x 587 mm
	Folded	457 x 562 x 138 mm
	Weight	Approx. 18.7 lbs (8.5kg) (Main unit only)
	Power source	DC12V (AC adapter : AC100 to 240V)
	Power consumption	30W (AC adapter included)
