## INTELLIGENT DIGITAL DISK RECORDER

### User Manual — Workstation mode —

17 September, 2009

## Cautions

- (1) It is prohibited to copy a part or all of this product without prior permission.
- (2) The contents or specifications of this product may be changed without prior notice.
- (3) We have prepared the contents of this product to the best of our ability; however if you have any questions about the contents, or if there are any errors or missing items, please contact Grass Valley.
- (4) However we do not take any responsibility for malfunctions arising from use, irrespective of the points outlined in (3).
- (5) Irrespective of whether it was due to a usage error, Grass Valley takes no responsibility for extraordinary, incidental or derivative claims, including those for lost earnings generated by the application of this product.
- (6) It is prohibited to analyze, reverse engineer, decompile or disassemble any of the items included with this product, including the software, hardware and manual.
- (7) Microsoft and Windows are registered trademarks of the Microsoft Corporation, USA.
- (8) DVCPRO HD is the trademark of the Panasonic Corporation.
- (9) HDV and HDV logos are the trademarks of Sony Corporation and Victor Company of Japan, Limited (JVC).
- (10) Other product names or related brand names are trademarks or registered trademarks of their respective companies.

## About this manual

- The screens used as examples in this manual are those of the development stage, so they may vary from those in the final product.
- If there are any variations between the explanation in this manual and the actual application method, priority is given to the actual application method.
- This manual is written for people who have a basic knowledge of how to use a computer. If there are no special instructions, perform the same operation as a normal computer operation.
- In this manual, the system of the T2 is called "Workstation".

## Warning

- Health precautions

In rare cases, flashing lights or stimulation from the bright light of a computer display or TV monitor may trigger temporary epileptic seizures or loss of consciousness. It is believed that even individuals whom have never experienced such symptoms may be susceptible. If you or close relatives have experienced any of these symptoms, consult a doctor before using this product.

# Notice

## Microsoft Software License Terms for:

### Windows XP Embedded and Windows Embedded Standard Runtime

These license terms are an agreement between you and Thomson Canopus. Please read them. They apply to the software included on this device. The software also includes any separate media on which you received the software.

The software on this device includes software licensed from Microsoft Corporation or its affiliate.

The terms also apply to any Microsoft

- Updates,
- Supplements,
- Internet-based services, and
- Support services

for this software, unless other terms accompany those items. If so, those terms apply. If you obtain updates or supplements directly from Microsoft, then Microsoft, and not *Thomson Canopus*, licenses those to you.

**As described below, using some features also operates as your consent to the transmission of certain standard computer information for Internet-based services.**

**By using the software, you accept these terms. If you do not accept them, do not use or copy the software. Instead, contact Thomson Canopus to determine its return policy for a refund or credit.**

If you comply with these license terms, you have the rights below.

**1. Use Rights.**

You may use the software on the device with which you acquired the software.

**2. Additional Licensing Requirements and/or Use Rights.**

a. **Specific Use.** Thomson Canopus designed this device for a specific use. You may only use the software for that use.

b. **Other Software.** You may use other programs with the software as long as the other programs

- Directly support the manufacturer's specific use for the device, or
- Provide system utilities, resource management, or anti-virus or similar protection.

Software that provides consumer or business tasks or processes may not be run on the device. This includes email, word processing, spreadsheet, database, scheduling and personal finance software. The device may use terminal services protocols to access such software running on a server.

**c. Device Connections.**

- You may use terminal services protocols to connect the device to another device running business task or processes software such as email, word processing, scheduling or spreadsheets.
- You may allow up to ten other devices to access the software to use
  - File Services,
  - Print Services,
  - Internet Information Services, and
  - Internet Connection Sharing and Telephony Services.

The ten connection limit applies to devices that access the software indirectly through "multiplexing" or other software or hardware that pools connections. You may use unlimited inbound connections at any time via TCP/IP.

**3. Scope of License.** The software is licensed, not sold. This agreement only gives you some rights to use the software. Thomson Canopus and Microsoft reserve all other rights. Unless applicable law gives you more rights despite this limitation, you may use the software only as expressly permitted in this agreement. In doing so, you must comply with any technical limitations in the software that allow you to use it only in certain ways. For more information, see the software documentation or contact *Thomson Canopus*. Except and only to the extent permitted by applicable law despite these limitations, you may not:

- Work around any technical limitations in the software;
- Reverse engineer, decompile or disassemble the software;
- Make more copies of the software than specified in this agreement;
- Publish the software for others to copy;
- Rent, lease or lend the software; or
- Use the software for commercial software hosting services.

Except as expressly provided in this agreement, rights to access the software on this device do not give you any right to implement Microsoft patents or other Microsoft intellectual property in software or devices that access this device.

You may use remote access technologies in the software such as Remote Desktop to access the software remotely from another device. You are responsible for obtaining any licenses required for use of these protocols to access other software.

- Remote Boot Feature. If the Thomson Canopus enabled the device Remote Boot feature of the software, you may
  - (i) use the Remote Boot Installation Service (RBIS) tool only to install one copy of the software on your server and to deploy the software on licensed devices as part of the Remote Boot process; and
  - (ii) use the Remote Boot Installation Service only for deployment of the software to devices as part of the Remote Boot process; and
  - (iii) download the software to licensed devices and use it on them.

For more information, please refer to the device documentation or contact *Thomson Canopus*.

- Internet-Based Services. Microsoft provides Internet-based services with the software. Microsoft may change or cancel them at any time.

- a. **Consent for Internet-Based Services.** The software features described below connect to Microsoft or service provider computer systems over the Internet. In some cases, you will not receive a separate notice when they connect. You may switch off these features or not use them. For more information about these features, visit

<http://www.microsoft.com/windowsxp/downloads/updates/sp2/docs/privacy.msp>.

**By using these features, you consent to the transmission of this information.** Microsoft does not use the information to identify or contact you.

- b. **Computer Information.** The following features use Internet protocols, which send to the appropriate systems computer information, such as your Internet protocol address, the type of operating system, browser and name and version of the software you are using, and the language code of the device where you installed the software. Microsoft uses this information to make the Internet-based services available to you.

- **Web Content Features.** Features in the software can retrieve related content from Microsoft and provide it to you. To provide the content, these features send to Microsoft the type of operating system, name and version of the software you are using, type of browser and language code of the device where the software was installed. Examples of these features are clip art, templates, online training, online assistance and Appshelp. These features only operate when you activate them. You may choose to switch them off or not use them.
- **Digital Certificates.** The software uses digital certificates. These digital certificates confirm the identity of Internet users sending X.509 standard encrypted information. The software retrieves certificates and updates certificate revocation lists. These security features operate only when you use the Internet.
- **Auto Root Update.** The Auto Root Update feature updates the list of trusted certificate authorities. You can switch off the Auto Root Update feature.
- **Windows Media Player.** When you use Windows Media Player, it checks with Microsoft for
  - Compatible online music services in your region;
  - New versions of the player; and
  - Codecs if your device does not have the correct ones for playing content. You can switch off this feature. For more information, go to:

<http://microsoft.com/windows/windowsmedia/mp10/privacy.aspx>.

- **Windows Media Digital Rights Management.** Content owners

use Windows Media digital rights management technology (WMDRM) to protect their intellectual property, including copyrights. This software and third party software use WMDRM to play and copy WMDRM-protected content. If the software fails to protect the content, content owners may ask Microsoft to revoke the software's ability to use WMDRM to play or copy protected content. Revocation does not affect other content. When you download licenses for protected content, you agree that Microsoft may include a revocation list with the licenses. Content owners may require you to upgrade WMDRM to access their content. Microsoft software that includes WMDRM will ask for your consent prior to the upgrade. If you decline an upgrade, you will not be able to access content that requires the upgrade. You may switch off WMDRM features that access the Internet. When these features are off, you can still play content for which you have a valid license.

- c. **Misuse of Internet-based Services.** You may not use these services in any way that could harm them or impair anyone else's use of them. You may not use the services to try to gain unauthorized access to any service, data, account or network by any means.
4. **Windows Update Agent (also known as Software Update Services).** The software on the device includes Windows Update Agent ("WUA") functionality that may enable your device to connect to and access updates ("Windows Updates") from a server installed with the required server component. Without limiting any other disclaimer in this Microsoft Software License Terms or any EULA accompanying a Windows Update, you acknowledge and agree that no warranty is provided by MS, Microsoft Corporation or their affiliates with respect to any Windows Update that you install or attempt to install on your device.
5. **Product Support.** Contact Thomson Canopus for support options. Refer to the support number provided with the device
6. **Backup Copy.** You may make one backup copy of the software. You may use it only to reinstall the software on the device.
7. **Proof Of License.** If you acquired the software on the device, or on a disc or other media, a genuine Certificate of Authenticity label with a genuine copy of the software identifies licensed software. To be valid, this label must be affixed to the device, or included on or in Thomson Canopus's software packaging. If you receive the label separately, it is not valid. You should keep the label on the device or packaging to prove that you are licensed to use the software. To identify genuine Microsoft software, see <http://www.howtotell.com>.
8. **Transfer to a Third Party.** You may transfer the software only with the device, the Certificate of Authenticity label, and these license terms directly to a third party. Before the transfer, that party must agree that these license terms apply to the transfer and use of the software. You may not retain any copies of the software including the backup copy.

9. **Not Fault Tolerant.** The software is not fault tolerant. Thomson Canopus installed the software on the device and is responsible for how it operates on the device.
10. **Restricted Use.** The Microsoft software was designed for systems that do not require fail-safe performance. You may not use the Microsoft software in any device or system in which a malfunction of the software would result in foreseeable risk of injury or death to any person. This includes operation of nuclear facilities, aircraft navigation or communication systems and air traffic control.
11. **No Warranties for the Software.** The software is provided “as is”. You bear all risks of using it. Microsoft gives no express warranties, guarantees or conditions. Any warranties you receive regarding the device or the software do not originate from, and are not binding on, Microsoft or its affiliates. When allowed by your local laws, Thomson Canopus and Microsoft exclude implied warranties of merchantability, fitness for a particular purpose and non-infringement.
12. **Liability Limitations.** You can recover from Microsoft and its affiliates only direct damages up to two hundred fifty U.S. Dollars (U.S. \$250.00). You cannot recover any other damages, including consequential, lost profits, special, indirect or incidental damages.

This limitation applies to:

- Anything related to the software, services, content (including code) on third party internet sites, or third party programs; and
- Claims for breach of contract, breach of warranty, guarantee or condition, strict liability, negligence, or other tort to the extent permitted by applicable law.

It also applies even if Microsoft should have been aware of the possibility of the damages. The above limitation may not apply to you because your country may not allow the exclusion or limitation of incidental, consequential or other damages.

13. **Export Restrictions.** The software is subject to United States export laws and regulations. You must comply with all domestic and international export laws and regulations that apply to the software. These laws include restrictions on destinations, end users and end use. For additional information, see [www.microsoft.com/exporting](http://www.microsoft.com/exporting).

# Setup

## Overview

The T2 is a multi-channel digital video recorder that allows simultaneous recording and playback of media stored on internal disk drives. The T2 features a single recording channel (R1) and two playback channels (P1/P2). The quantity of hours recorded depends on the video compression settings that are selected. The front panel touch screen and TFT display, along with front panel transport controls, allow easy operation and monitoring with minimal external connections. The T2 also provides a Workstation mode, in which you can connect a keyboard, a mouse, and a VGA monitor to the T2's rear panel. The Workstation mode provides a graphical user interface to handle all essential tasks that are provided in front panel mode, and more.

With the Jog/Shuttle or the external controllers, variable speed playback is available.

## Features

- Supporting a high quality “Canopus HQ Codec”, the T2 can handle videos in full resolution (1920x1080), 4:2:2 color space, and up to 200Mbps.
- The T2 can load and play HQ videos edited on Grass Valley EDIUS, without any additional encoding.
- Equipped with 1 input line and 2 HD/SD-SDI output lines, recording and playback are available simultaneously, as well as playbacks with the 2 output channels perfectly synchronized.
- Supports RS-422A deck controls.
- Supports remote controls via GPI.
- Equipped with a 7-inched touch screen LCD and a jog/shuttle knob, the T2 can be operated as a stand-alone unit.
- With an external display, a keyboard and a mouse connected to the T2, the same operations as those in the Front Panel mode will be available (Workstation mode).
- Supports file import in various formats including QuickTime\* and Windows Media.

\* QuickTime is not supported in some codecs.

# Part names and functions

## Front panel

<b>Touch screen LCD</b>	Displays the T2 screens. By touching on the items displayed on screen, T2 can be operated.
<b>DVD-ROM drive</b>	Used to import video/audio media files stored on DVD-ROM. * Does not support DVD-Video playback.
<b>Power switch</b>	Turns on/off the T2.
<b>USB ports</b>	Used to connect USB removable devices.
<b>IEEE1394 port</b>	Used to connect IEEE1394 removable devices. * Does not support the connection of DV/HDV devices.
<b>Volume control</b>	Used to adjust the headphone volume.
<b>Headphone jack</b>	Used to connect a headphone.
<b>Jog/Shuttle</b>	(See next page)
<b>Control buttons</b>	(See next page)

## Control buttons

<b>R1 button</b>	Switches the Recorder channel to active.
<b>P1 button</b>	Switches the Player1 channel to active.
<b>P2 button</b>	Switches the Player2 channel to active.
<b>Rew button</b>	Moves back frame by frame. Keep pressing the button will fast-rewind.
<b>Play button</b>	Starts playback.
<b>FF button</b>	Moves forward frame by frame. Keep pressing the button will fast-forward.
<b>Stop button</b>	Stops playback/recording.
<b>Rec button</b>	Starts recording.
<b>Shuttle/Jog button</b>	Makes Jog/Shuttle active. (Switches modes from VAR button.)
<b>VAR button</b>	Executes variable speed playback. (Opens the control screen. Switches modes from Shuttle/Jog button.)
<b>Jog/Shuttle</b>	Executes jog playback, shuttle playback.
<b>Rew + Stop buttons</b>	While playing a clip Moves to the previous IN/OUT point, or the top of the clip. While playing a playlist Moves to the previous event.
<b>FF + Stop buttons</b>	While playing a clip Moves to the next IN/OUT point, or the end of the clip. While playing a playlist Moves to the next event.

## Rear panel

<b>AC Power inlet (3 pin)</b>	Use the supplied power cable and connect to the AC power.
<b>Main power switch</b>	Turns the main power ON/OFF.
<b>Analog audio I/O section</b>	Used for analog audio I/O.
<b>Mouse port (PS/2)</b>	Used to connect a mouse.
<b>Keyboard port (PS/2)</b>	Used to connect a keyboard.
<b>Serial port</b>	Not used.
<b>Monitor port</b>	Used to connect a PC monitor.
<b>USB (2.0)</b>	Used to connect a keyboard or mouse.
<b>LAN</b>	Used to connect a LAN cable.
<b>Sound</b>	Not used.
<b>R1 input section</b>	Used for inputting to the R1 channel.
<b>P1 output section</b>	Used for outputting from the P1 channel.
<b>P2 output section</b>	Used for outputting from the P2 channel.
<b>REF IN</b>	Used to input REF signal.
<b>GPI I/O</b>	Used for GPI I/O.
<b>IEEE1394</b>	Used to connect a device via IEEE1394.
<b>MONITOR</b>	Used for audio monitor.
<b>REMOTE RS422</b>	Used for remote control of R1, P1, P2 channels.

Analog audio I/O section

<b>R1 – CH1</b> <b>R1 – CH2</b>	Used for audio input to the R1 channel. Balanced audio input. XLR-3-31x2 (CH1-2)
<b>P1 – CH1</b> <b>P1 – CH2</b>	Used for audio output from the P1 channel. Balanced audio output. XLR-3-32x2 (CH1-2)
<b>P2 – CH1</b> <b>P2 – CH2</b>	Used for audio output from the P2 channel. Balanced audio output. XLR-3-32x2 (CH1-2)

R1 input section

<b>LTC</b>	Used for LTC (timecode) input.
<b>AES/EBU</b>	Used for digital audio (AES/EBU) input.
<b>CMPST</b>	Used for Composite input.
<b>DVI-I</b>	Used for DVI-I input (for DVI, YPbPr).
<b>SDI</b>	Used for SDI input (left), and for active through (right).

P1/P2 output section

LTC	Used for LTC (timecode) output.
AES/EBU	Used for digital audio (AES/EBU) output.
CMPST	Used for Composite output.
DVI-I	Used for DVI-I output (for DVI, RGB, YPbPr).
SDI	Used for SDI output.
MONITOR	Used for monitor output (Composite).

**Note**      The YPbPr signal is input/output via analog RGB pins on the DVI-I port. To output YPbPr, use a RGB conversion connector cable.

## Start-up and shutdown

### Start-up

The following procedure is to start-up the T2.

1. Switch the Main power switch on the rear panel to the on position, and turn the Power switch on the front panel ON.

*Power switch*

2. T2 starts up and the 3ch View screen appears on the touch screen LCD.

*3ch View*

## Switching to the Workstation mode

When the T2 starts up, it is running in the Front Panel mode by default. To switch it to the Workstation mode, perform the following procedure.

1. On the PC monitor connected to the T2, choose **Switch to Workstation mode** from the **System** menu.

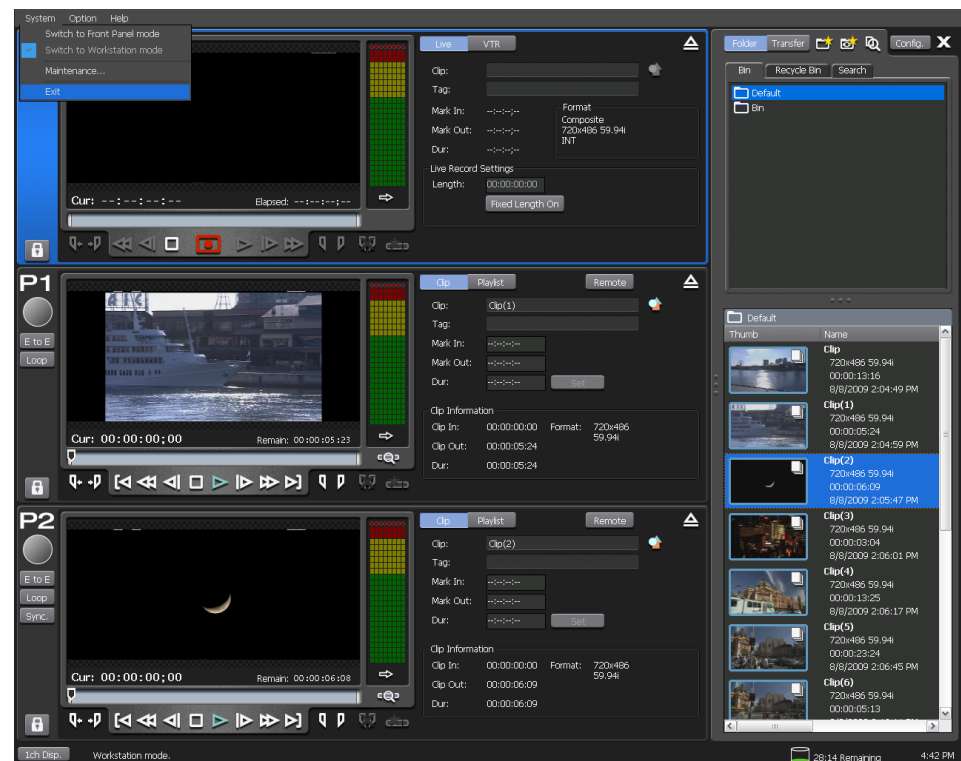

\* To switch back to the Front Panel mode, touch the touch screen LCD screen, or choose **Switch to Front Panel Mode** from the **System** menu on the PC monitor.

## Shutdown

The following procedure is to shutdown the T2.

1. Choose **System - Exit**.

### System menu

2. On the dialog displayed, choose **Shutdown** and click the **OK** button.

To turn the T2's main power off, wait until the screen goes blank, confirm that the shutdown is complete, and then turn off the main power switch on the rear panel.

# Hardware settings

Clicking the **Config** button at the top right corner of the screen displayed in the Workstation mode, the System settings screen will open.

Modify the settings according to your environment.

Config button

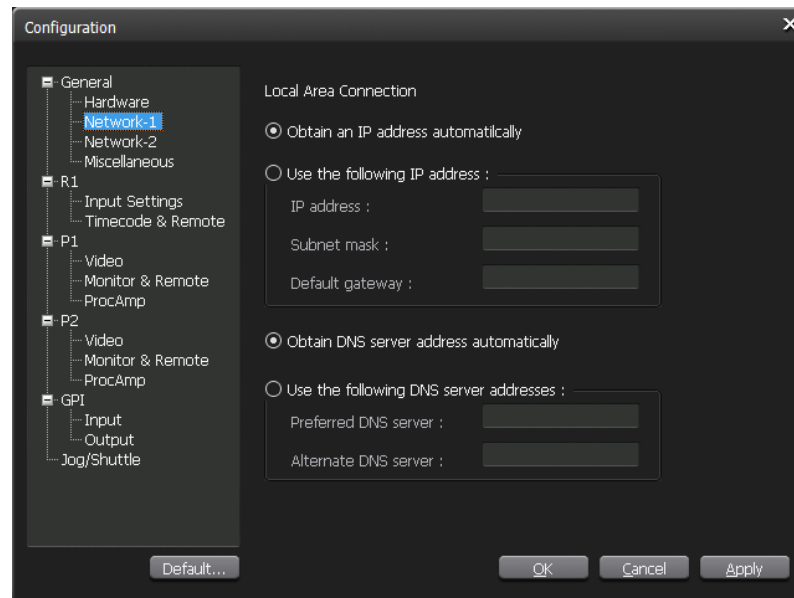

## System settings

### Hardware settings

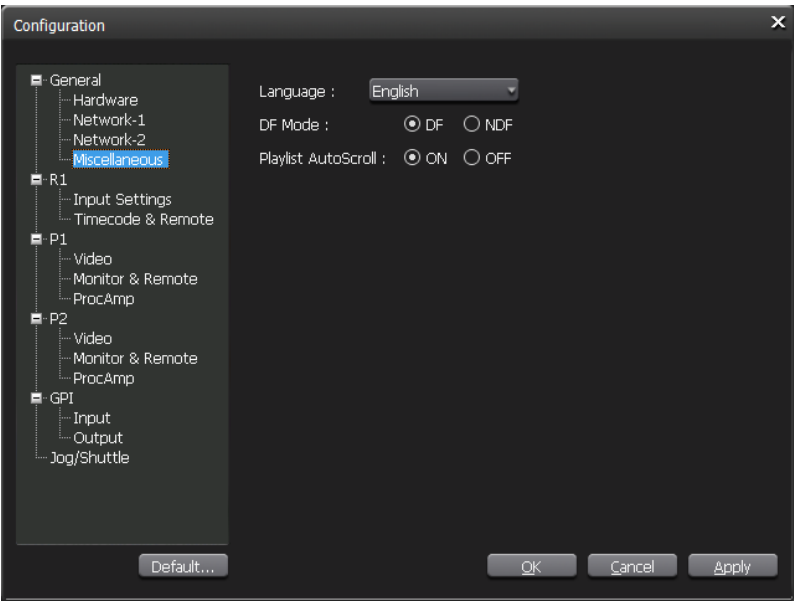

Reference	The options you can choose from for the reference input method are <b>External</b> , <b>Input</b> and <b>Internal</b> . The sync status is displayed in the boxes below this button. <b>P1</b> Displays if the P1 channel is synchronized. <b>P2</b> Displays if the P2 channel is synchronized. <b>3Sync phase</b> To use the HD tri-level REF signal as the HD REF signal, check this box. Enter a value to adjust the REF phase. (Available only for <b>External</b> ) <b>HD BB phase</b> To use the SD Black Burst REF signal as the HD REF signal, check this box. Enter a value to adjust the REF phase. (Available only for <b>External</b> ) <b>SD BB phase</b> To use the SD Black Burst REF signal as the SD REF signal, check this box. Enter a value to adjust the REF phase. (Available only for <b>External</b> )
Audio Reference Level	Adjusts the audio reference level (Headroom).
Input/Output level	Adjusts the audio input/output level.

## Network-1/Network-2 settings

<b>Obtain an IP address automatically</b>	Check this option to obtain an IP address automatically via DHCP.
<b>Use the following IP address</b>	<p>Establishes a local area connection by specifying an IP address, subnet mask and default gateway.</p> <p><b>IP address</b> Specify an IP address.</p> <p><b>Subnet mask</b> Specify a subnet mask.</p> <p><b>Default gateway</b> Specify a default gateway.</p>
<b>Obtain DNS server address automatically</b>	Check this option to obtain a DNS server address automatically via DHCP.
<b>Use the following DNS server addresses</b>	<p>Establishes a local area connection by specifying addresses for the default DNS server and an alternate DNS server.</p> <p><b>Preferred DNS server</b> Specify a default DNS server address.</p> <p><b>Alternate DNS server</b> Specify an alternate DNS server address.</p>

## Miscellaneous settings

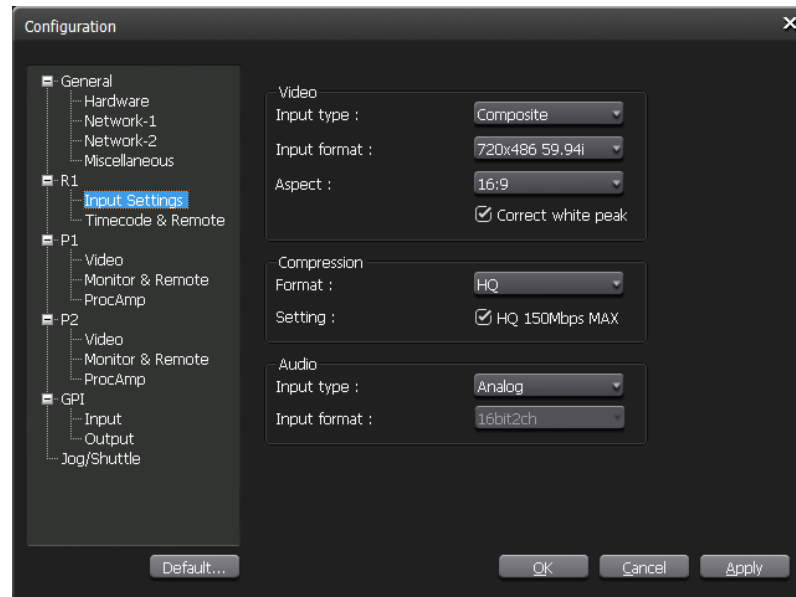

Language	Choose between <b>English</b> and <b>Japanese</b> for the on-screen language. * Restarting the system is required to apply the setting.
DF Mode	Specify either drop-frame or non-drop frame to be used. <b>DF</b> Check this option to use Drop frame. <b>NDF</b> Check this option to use Non-drop frame.
Playlist AutoScroll	Specify if you want the Event List of the playlist to automatically scroll.

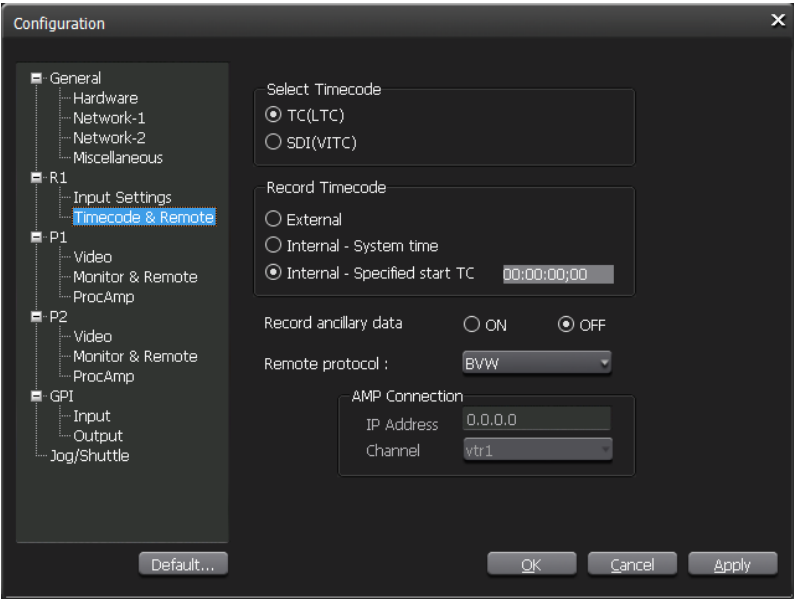

## R1 channel settings

### Input Settings

<b>Video</b>	<b>Input type</b> Choose a type of video input. <b>Input format</b> Choose a format for the video input. <b>Aspect</b> Choose the aspect ratio for the SD input. <b>Correct white peak</b> Check this option to enable white peak correction.
<b>Compression</b>	<b>Format</b> Specify the compression format. <b>Setting</b> Check this option to limit the compression rate for the Canopus HQ codec, up to 150Mbps.
<b>Audio</b>	<b>Input type</b> Specify the audio input format from <b>Analog</b> , <b>AES/EBU</b> (digital) and <b>SDI embedded</b> . <b>Input format</b> Check this option to record in 16bit 2ch.

Timecode & Remote settings

Select Timecode	Specify the format for the timecode from <b>TC (LTC)</b> and <b>SDI (VITC)</b> .
Record Timecode	Choose the timecode to use for recording. <b>External</b> Uses the timecode from the external device. <b>Internal-System time</b> Uses the system clock. <b>Internal-Specified start TC</b> Specify a value as the beginning timecode.
Record ancillary data	Setting this option to ON will record VANC.
Remote protocol	Choose a REMOTE protocol from <b>BVW</b> and <b>AMP</b> .
AMP Connection	Specify an IP address and a channel for AMP connection.

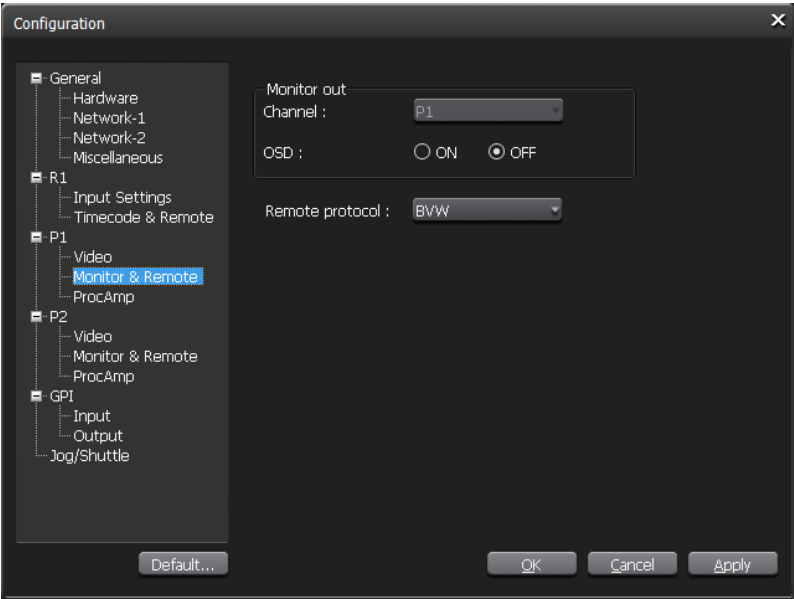

## P1/P2 channel settings

### Video settings

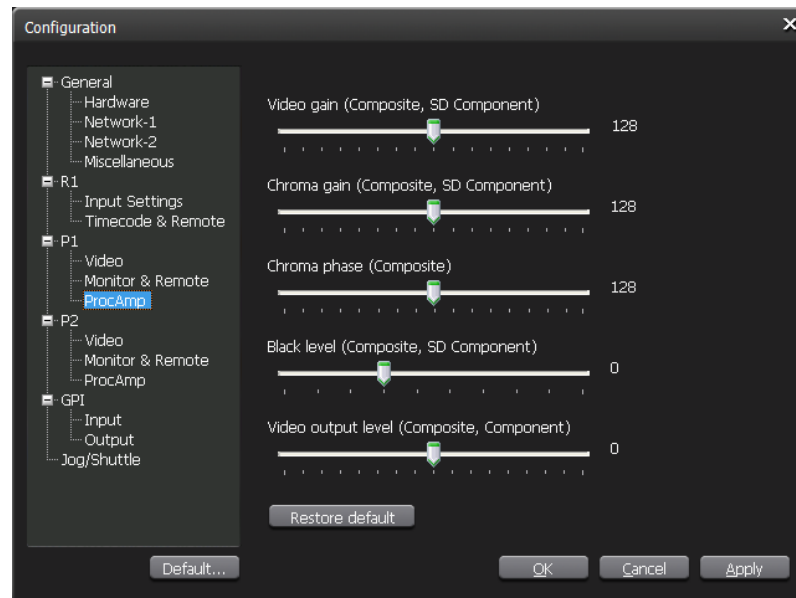

<b>Format</b>	Specify the resolution and the frame rate for the output video.
<b>DVI option</b>	Choose a video resolution to use with DVI/RGB format for output.
<b>Output capability</b>	Displays available format with highlight.
<b>Aspect</b>	Specify the aspect ratio. Choose <b>4:3</b> or <b>16:9</b> for SD video.
<b>Component type</b>	Choose the type of the analog signal output via DVI-I port.
<b>Pedestal</b>	Choose the setup (black) level in NTSC. Choose <b>7.5IRE</b> for North America.

## Monitor & Remote settings

<b>Monitor out</b>	<p>Specify the channel to use for monitor out, and specify if OSD (on-screen display) is enabled.</p> <p><b>Channel</b> Specify the channel to use for monitor out. Only <b>P1</b> is available for <b>P1</b> channel, while <b>P1</b> and <b>P2</b> for <b>P2</b> channel.</p> <p><b>OSD</b> Enables/Disables the on-screen display.</p>
<b>Remote protocol</b>	<p>Choose a REMOTE protocol from <b>BVW</b> and <b>AMP</b>.</p>

## ProcAmp settings

<b>Video gain</b>	Adjusts the Video gain. (Available only for Composite and SD Component)
<b>Chroma gain</b>	Adjusts the Chroma gain. (Available only for Composite and SD Component)
<b>Chroma phase</b>	Adjusts the Chroma phase. (Available only for Composite)
<b>Black level</b>	Adjusts the Black level. (Available only for Composite and SD Component)
<b>Video output level</b>	Adjusts the Video output level. (Available only for Composite and Component)

# GPI settings

## Input settings

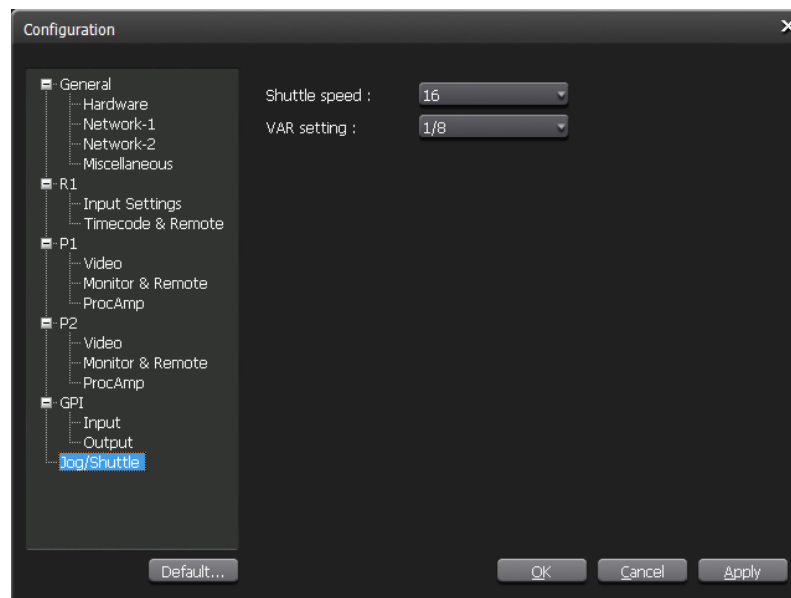

<b>GPI-Input</b>	Use the <b>Previous</b> and <b>Next</b> buttons to choose the GPI input trigger.
<b>Trigger Settings</b>	<p>Permits specification of the GPI input trigger settings.</p> <p><b>Channel</b> Choose a channel to respond to the GPI input trigger.</p> <p><b>Action</b> Specify the action caused by the trigger.</p> <ul style="list-style-type: none"><li>• Stop ..... Stops playback/recording.</li><li>• Play..... Plays the clip or playlist loaded to a channel.</li><li>• Record ..... Starts recording.</li><li>• Rewind..... Rewinds. Rewinding stops at the start of the content, or when other action is performed.</li><li>• FastFwd ..... Executes Fast Forward. Fast Forward stops at the end of the content, or when other action is performed.</li><li>• CueStart..... Cues up to the IN point of the content loaded.</li><li>• CueEnd ..... Cues up to the OUT point of the content loaded.</li><li>• Eject..... Unloads the content loaded.</li><li>• Preview ..... Loads the clip uploaded from the R1 channel onto the P1 channel.</li><li>• CueNextEvent ..... Cues up to the next event on the playlist loaded.</li><li>• CuePrevEvent ..... Cues up to the previous event on the playlist loaded.</li><li>• VARPlayback..... Plays the content in the speed specified in Variable speed playback mode (see "Jog/Shuttle settings").</li></ul> <p><b>Active</b> Choose the GPI signal to activate from <b>High</b> and <b>Low</b>.</p>

## Output settings

<b>GPI-Output</b>	Use the <b>Previous</b> and <b>Next</b> buttons to choose the GPI output trigger.
<b>Trigger Settings</b>	<p>Permits specification of the GPI output trigger settings.</p> <p><b>Name</b> Specify the name of the trigger.</p> <p><b>Active</b> Choose the GPI signal to activate from <b>High</b> and <b>Low</b>.</p>

## Jog/Shuttle settings

<b>Shuttle speed</b>	Choose the maximum shuttle speed, either <b>16x</b> or <b>32x</b> .
<b>VAR setting</b>	Choose the playback speed in the Variable speed playback mode, between <b>1/8</b> , <b>1/4</b> and <b>1/2</b> .

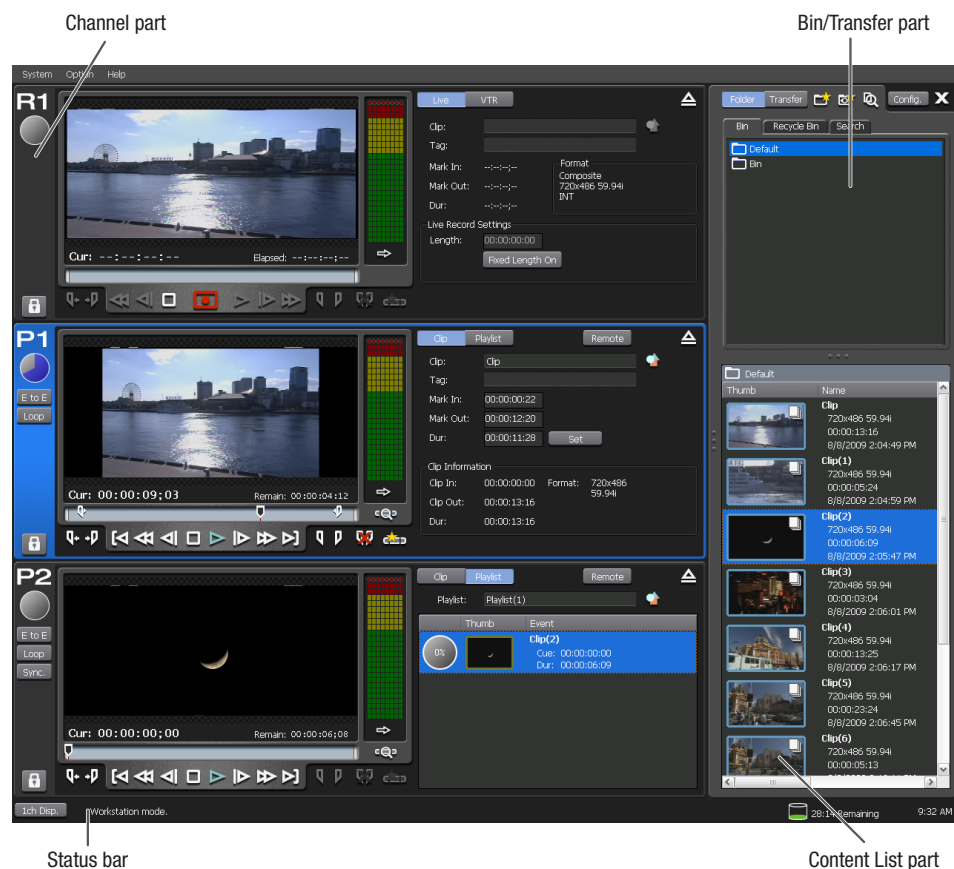

# Workstation mode

## Overview

In the Workstation mode, you can operate the T2 via the display monitor connected to the T2, using the mouse and the keyboard. Touching the touch screen LCD while the T2 is running in the Workstation mode, it's switched to the Front Panel mode.

## T2 screen modes and functions

The Workstation screen consists of the following.

- Menu bar
- Status bar
- Bin/Transfer part
- Content List part
- Channel part

## Menu bar

### System menu

<b>Switch to Front Panel mode</b>	Choose this option to exit Workstation mode and switch the T2 to Front Panel mode.
<b>Switch to Workstation mode</b>	Choose this option to exit Front Panel mode and switch the T2 to Workstation mode.
<b>Maintenance</b>	Choose this option to switch the T2 to Maintenance mode. Entering a password is required.
<b>Exit</b>	Choose this option to restart or shutdown the T2.

### Option menu

<b>Log</b>	Choose this option to specify the log level or to show logs. <b>Logging level</b> Opens the dialog to specify the log level. <b>Show log</b> Displays the log.
<b>Remove Device</b>	Choose this option to list the removable devices and choose the device to remove.

### Help menu

<b>About T2</b>	Displays the application version.
-----------------	-----------------------------------

## Status bar

<b>Display Mode button</b>	Switches the display mode between <b>3ch Display</b> and <b>Full Display</b> of a channel.
<b>Operation mode</b>	Displays the current operation mode.
<b>HDD capacity</b>	Displays the estimated amount of time for recording.
<b>Clock</b>	Displays the current time.

## Bin/Folder part

### Bin folder

<b>Folder/Transfer button</b>	Switches the screen between Bin folder screen and Transfer screen.
<b>New Folder button</b>	Creates a new Bin folder.
<b>Watch Folder button</b>	Enables/Disables the Watch folder.
<b>Search button</b>	Use this button to search clip or playlist with search keys specified.
<b>Config button</b>	Opens the system settings screen.
<b>Bin tab</b>	Displays the folder that stores clips and playlists.
<b>Recycle Bin tab</b>	Displays the clips and playlists (and their folder) deleted from the Bin folder.
<b>Search tab</b>	Displays the folder hit by the search.

## Creating Watch Folder screen

By specifying the folder created on a data drive as a Watch folder, you can share it via FTP. The folder specified as a Watch folder is kept watched, and when media files are added to the folder, they will automatically be added to the Bin. (The media file will be moved to the specified media folder.)

<b>Target Bin</b>	Displays the Bin folder name to be used as a Watch folder.
<b>FTP</b>	Specify the FTP user name and its password. <b>User Name</b> Input a user name. <b>Password</b> Input the password.

Search Key options

Bin	Specifies the target folder for the search.
Name	Use this option to search by name.
Date	Use this option to search by created date or updated date (A – B, Before A, or After A).
Type	Use this option to search by Standard (HD/SD).
Tag	Use this option to search by TAG (multiple tags, partial match retrieval). * To enter multiple strings, delimit with "." (period).

## Bin folder – Right click menu

<b>Search</b>	Use this option to search clips or playlists, specifying keys (in the selected folder only).
<b>Duplicate</b>	Duplicates the Bin folder.
<b>Delete</b>	Deletes the selected folder from the Bin and moves them to the Recycle Bin. The contents (clip, playlist) of the folder will also be deleted.
<b>Rename</b>	Renames the selected Bin folder.
<b>Properties</b>	Opens the properties dialog for the selected Bin folder.

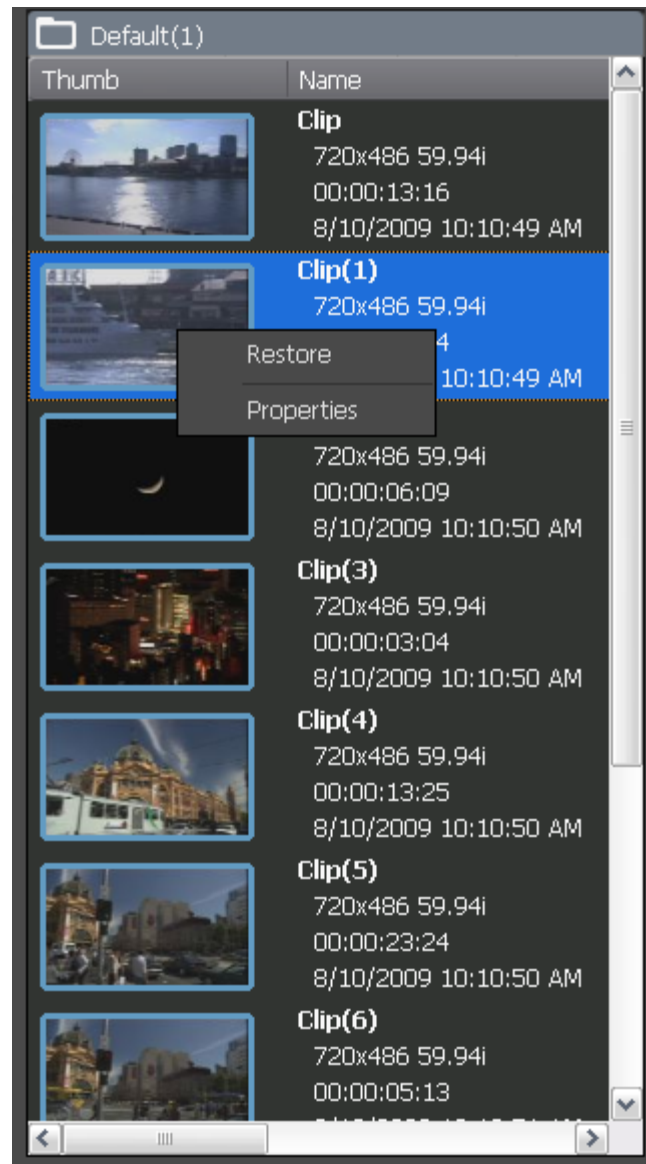

RecycleBin – Folder – Right click menu

<b>Restore</b>	Restores the folder to the original Bin. When a playlist is restored, if the clips used in the playlist exist in the RecycleBin, the clips will also be restored.
<b>Empty Recycle Bin</b>	Deletes all the contents in the Recycle Bin. Note that the deleted contents cannot be restored.

## RecycleBin – Clip/Playlist – Right click menu

<b>Restore</b>	Restores the item to the original Bin, and then opens the Bin folder. When a playlist is restored, if the clips used in the playlist exist in the RecycleBin, the clips will also be restored.
<b>Properties</b>	Opens the properties dialog for the selected content.

## Search – Right click menu

<b>Change Criteria...</b>	Use this option to search with other criteria.
<b>Clear</b>	Use this option to clear the search result.
<b>Rename</b>	Use this option to change the name of the search result.

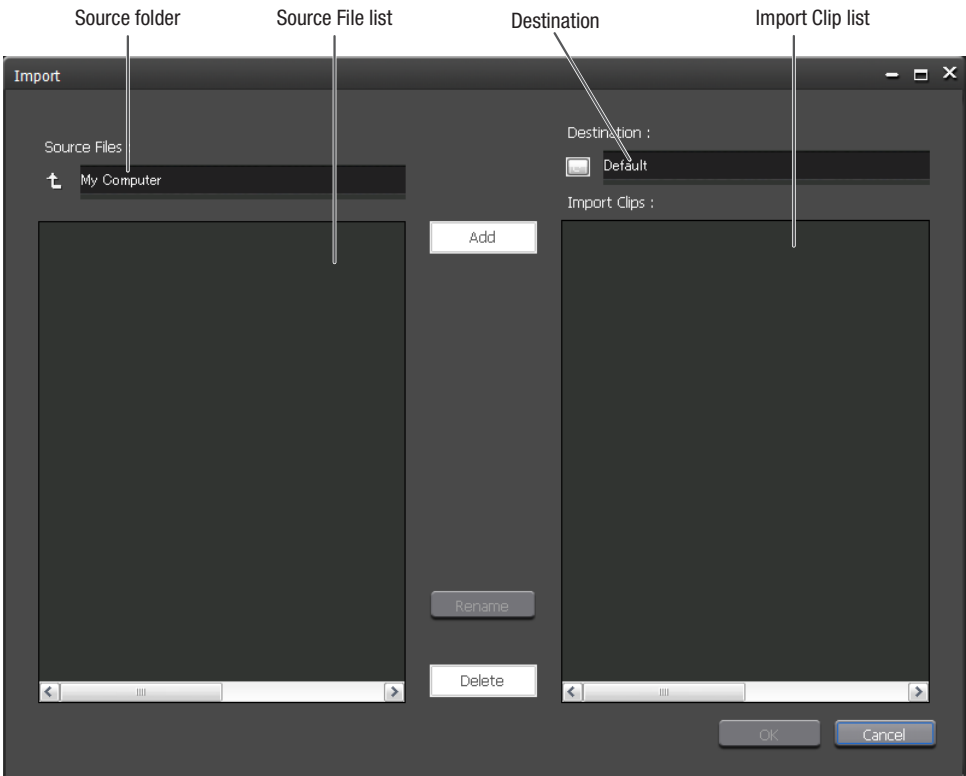

## Transfer screen

Clicking the **Transfer** button at the top of the Bin folder part opens the Transfer screen that displays the transfer status (registered transfer jobs and their status).

<b>Folder/Transfer button</b>	Switches the screen between Bin folder screen and Transfer screen.
<b>Import button</b>	Displays the Import screen.
<b>Export button</b>	Displays the Export screen.
<b>Delete button</b>	Deletes the selected job. Clicking the button while transferring will stop the transfer.
<b>Clear button</b>	Deletes all jobs on the job list.

Import screen

Source folder	Displays the source folder that the contents are imported from. Clicking the button on the left opens the parent folder.
Source File list	Lists the media files (and folders) stored in the source folder.
Destination	Displays the destination Bin folder that the contents are imported to. Clicking the button on the left opens the folder selection dialog to change the destination folder.
Import Clip list	Lists the clips that will be imported.
Add button	Adds the media files selected in the Source File list to the Import Clip list. When the clips are redundant in the destination folder, the clip name will automatically be changed.
Rename button	Renames the selected clips chosen in the Import Clip list. (Only the clips to be imported can be renamed.)
Delete button	Deletes the selected clips chosen in the Import Clip list. (Only the clips to be imported will be deleted.)
OK button	Starts importing according to the Import Clip list registered (ie: Adds jobs to the Transfer screen), and closes the Import screen.
Cancel button	Closes the Import screen.

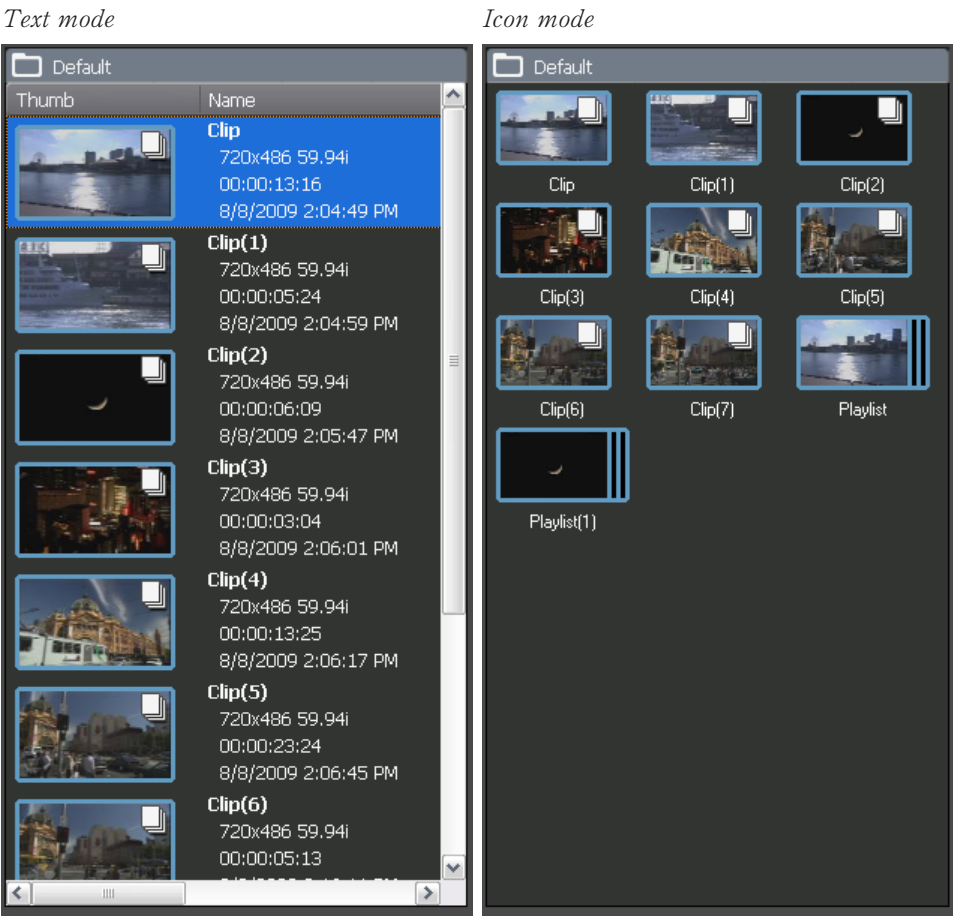

## Export screen

<b>Source Bin folder</b>	Displays the Bin folder that the contents are exported from. Clicking the button on the left opens the Bin selection dialog to change the Bin folder.
<b>Source Clip list</b>	Lists the clips stored in the source Bin folder.
<b>Destination folder</b>	Displays the destination folder that the contents are exported to. Clicking the button on the left opens the parent folder.
<b>Export File list</b>	Lists the clips (file name) to be exported. When the file is redundant in the destination folder, the file name will automatically be changed.
<b>Add button</b>	Adds the clips chosen in the Source Clip list to the Export File list.
<b>Rename button</b>	Renames the clip chosen in the Export File list from the list. (Only the clip to be exported can be renamed.)
<b>Delete button</b>	Deletes the clips chosen in the Export File list from the list. (Only the clips to be exported will be deleted.)
<b>OK button</b>	Starts Exporting according to the Export File list registered (ie: Adds jobs to the Transfer screen), and closes the Export screen.
<b>Cancel button</b>	Closes the Export screen.

## Content List part

Displays the Content List. From the right-click menu, the display mode can be switched between **Text mode** and **Icon mode** (Large/Small).

Folder name	Displays the folder name.
Thumbnail	Displays the thumbnail. The color of the frame can be chosen among 5 colors.
Content information	Displays the content information.

## Thumbnail icons

<b>Pairing icon</b>	Displayed on the clips/playlists that have been paired for the Sync mode.
<b>Lock icon</b>	Displayed on the clip/playlist that have been locked.
<b>Used in Playlist icon</b>	Displayed on the clip/playlist that have been used in a playlist.

## Selecting contents

Multiple contents (clip, playlist) can be chosen simultaneously with the **Ctrl** key or the **Shift** key pressed.

## Controlling contents

Contents can be moved to a folder in the Bin by drag & drop. Also, dragging contents with the **Ctrl** key pressed will duplicated them. When files or clips are duplicated, suffixes are automatically added.

## Contents preview

Thumbnails of the contents can be displayed in a six-parted film strip.

## Pairing contents (for sync mode)

From the right-click menu, pairing of contents for the sync mode between P1 and P2 channels can be set.

The paired items have Sync icon on their thumbnails.

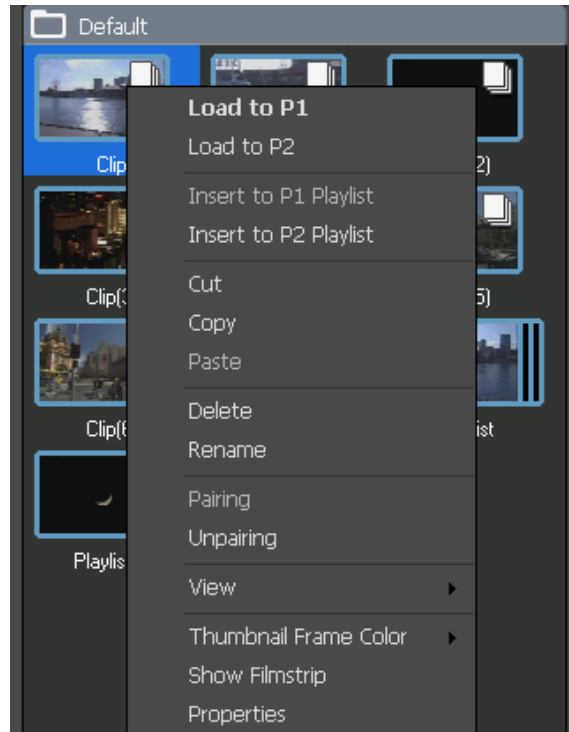

To cancel the pairing, choose one of the paired items, and choose **Unpairing** from the right-click menu.

## Requirements for pairing

- Contents must be of the same type. (clip and clip or playlist and playlist). Combinations between clip and playlist are not available for pairing contents in the Sync mode.
- Video format must be available and loaded on the same profile.
- Audio types do not matter.

## Clip/Playlist – Right click menu

<b>Load to P1</b>	Loads the selected content to the P1 channel. *1
<b>Load to P2</b>	Loads the selected content to the P2 channel. *1
<b>Insert to P1 Playlist</b>	Adds the selected content to the playlist loaded on the P1 channel. *1
<b>Insert to P2 Playlist</b>	Adds the selected content to the playlist loaded on the P2 channel. *1
<b>Cut</b>	Cuts the selected content (copies it to clipboard). *1
<b>Copy</b>	Copies the selected content (copies it to clipboard). *1
<b>Paste</b>	Pastes the content copied to clipboard.
<b>Delete</b>	Deletes the contents and moves them to the RecycleBin.
<b>Rename</b>	Changes the name of the selected content. *1
<b>Pairing</b>	Sets as paired contents for sync mode. *2
<b>Unpairing</b>	Cancels the pairing setting.
<b>View</b>	Switches display mode between Icon mode and Text mode.
<b>Thumbnail Frame Color</b>	Specifies the color of the thumbnail frame.
<b>Show Filmstrip</b>	Displays the preview of the contents with a six-parted film strip. *1
<b>Properties</b>	Displays the properties dialog of the content. *1

\*1 Available only when a content is chosen.

\*2 Available only when two contents are chosen.

## Channel part

The channel part has two display modes: 3ch Display and Full display.

### 3ch Display

### Full Display

## 3ch Display

Displays R1, P1 and P2 channels. Clicking of each channel will activate the channel.

## R1 channel

This channel is used to record the input signal.

For details on the items shown on the screen, see *Full Display – Recorder channel* page.

## P1/P2 channel – Clip Player

This channel is used to play a clip.

For details on the items shown on the screen, see *Full Display – Clip Player* page.

## P1/P2 channel – Playlist Player

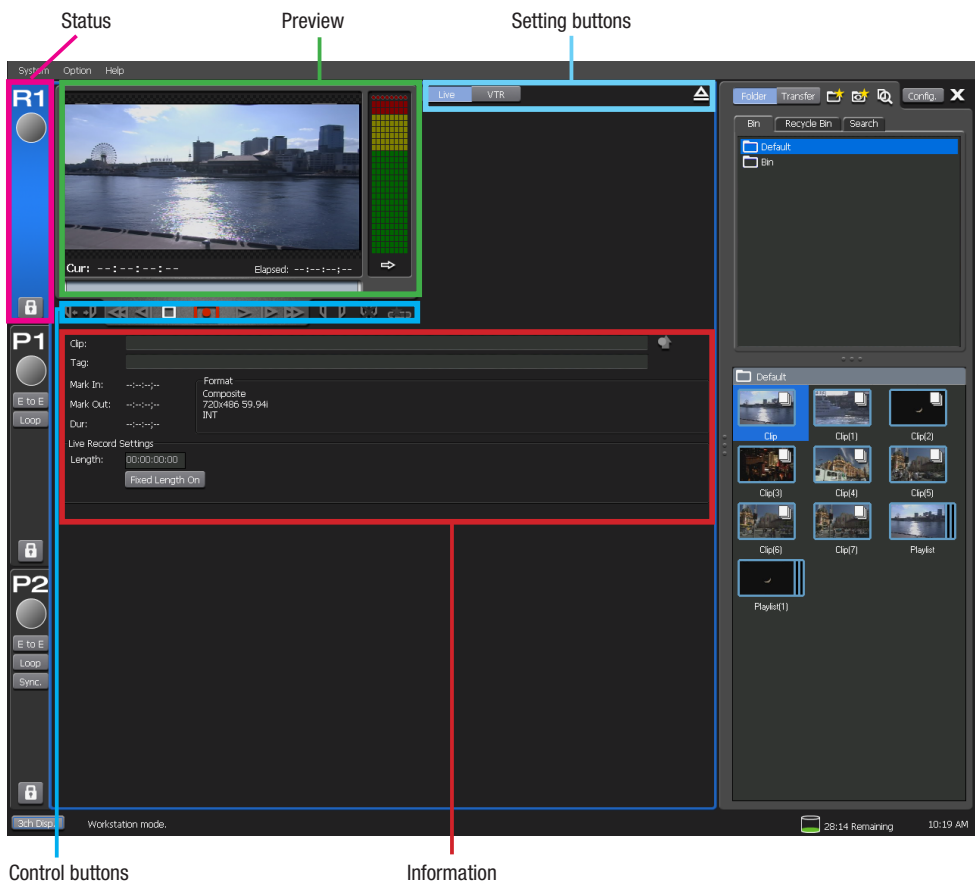

This channel is used to play a playlist.

For details on the items shown on the screen, see *Full Display – Playlist Player* page.

## Full Display - Recorder screen

On this screen, you can modify the settings for recording and/or execute the recording. When the capacity of the HDD becomes low, the HDD icon is displayed in red. In that case, a warning message appears at the beginning of the recording.

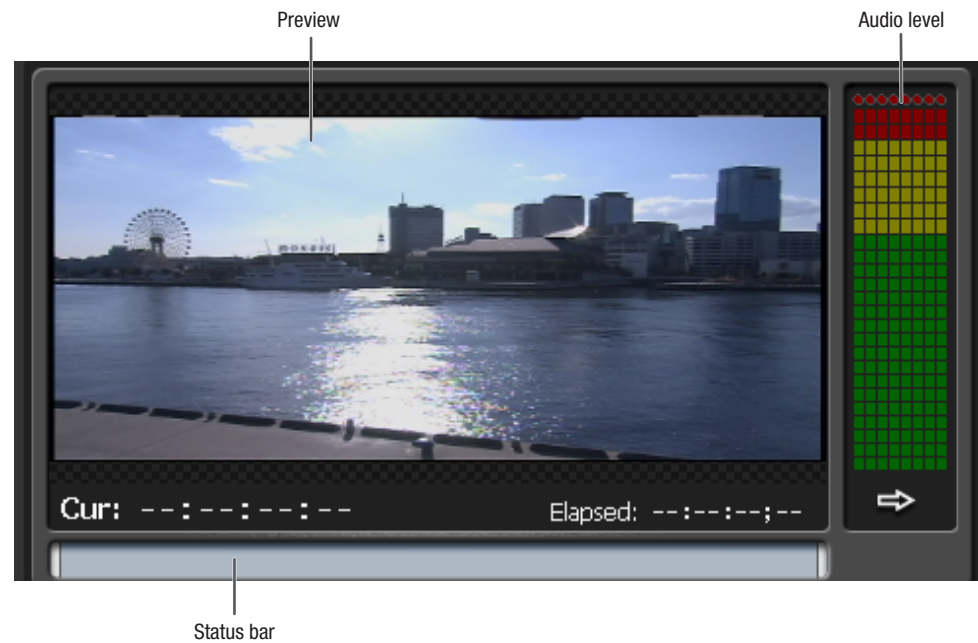

### Status

Status	Displays the status of the recording operation with a circular chart.
Lock button	Locks/Unlocks the channel.

## Preview

<b>Preview</b>	Displays the preview for the input video.
<b>Audio level</b>	Displays the input audio level.
<b>Cur</b>	Displays the current timecode.
<b>Elapsed</b>	Displays the elapsed recording time by timecode.
<b>Status bar</b>	Displays the recording status with a bar.

## Setting buttons

<b>Control Mode button</b>	<p>Switches the recording mode between Live and VTR.</p> <p><b>Live</b> Records the video input from an external device as live (stream). Perform operations manually for recording. When the Fixed Length Recording is activated, the recording automatically stops when the specified period of time has passed.</p> <p><b>VTR</b> You can specify the IN/OUT points before starting recording, controlling the external VTR device from T2. To use this mode, connection to an external device via RS-422A is required.</p>
<b>Unload button</b>	Unloads the loaded clip.

## Control buttons

<b>Cue (IN)</b>	Cues the VTR to the existing IN point. (Available only in VTR mode)
<b>Cue (OUT)</b>	Cues the VTR to the existing OUT point. (Available only in VTR mode)
<b>Rew button</b>	Rewinds the VTR. (Available only in VTR mode)
<b>Previous Frame button</b>	Moves back frame by frame. (Available only in VTR mode)
<b>Stop button</b>	Stops playback/recording.
<b>Rec button</b>	Starts recording.
<b>Play button</b>	Starts playback. (Available only in VTR mode)
<b>Next Frame button</b>	Moves forward frame by frame. (Available only in VTR mode)
<b>FF button</b>	Fast-forward the VTR. (Available only in VTR mode)
<b>Mark (IN)</b>	Marks the current position as the IN point of the content. Marking an IN point will set the timecode of the IN point in the timecode box.
<b>Mark (OUT)</b>	Marks the current position as the OUT point of the content. Marking an OUT point will set the timecode of the OUT point in the timecode box, as well as the duration of the clip in the Length box.
<b>Clear button</b>	Clears the existing IN/OUT points.

## Information

Clip:

Tag:

Format  
Composite  
720x486 59.94i  
INT

VTR Record Settings

VTR In:  Length: 00:00:00:00

VTR Out:  Fixed Length On

Dur:

<b>Clip</b>	Input a clip name.
<b>Tag</b>	Input tags.
<b>Format</b>	Displays the information including video size, frame rate, input type, source timecode (TC (LTC) / SDI (VITC) / INT), etc.
<b>VTR In</b>	Displays the timecode at the IN point.
<b>VTR Out</b>	Displays the timecode at the OUT point.
<b>Dur</b>	Displays the duration of the content between the IN-OUT points by timecode.
<b>Length</b>	Displays the duration of the clip in the Fixed Length mode.
<b>Fixed Length On</b>	Click this button to activate the Fixed Length recording mode.

Modes and functions of recording

See the following table for the recording modes and their functions.

	Crash Rec	Fixed Length Rec
VTR	○*1	○*1
Live	○	○

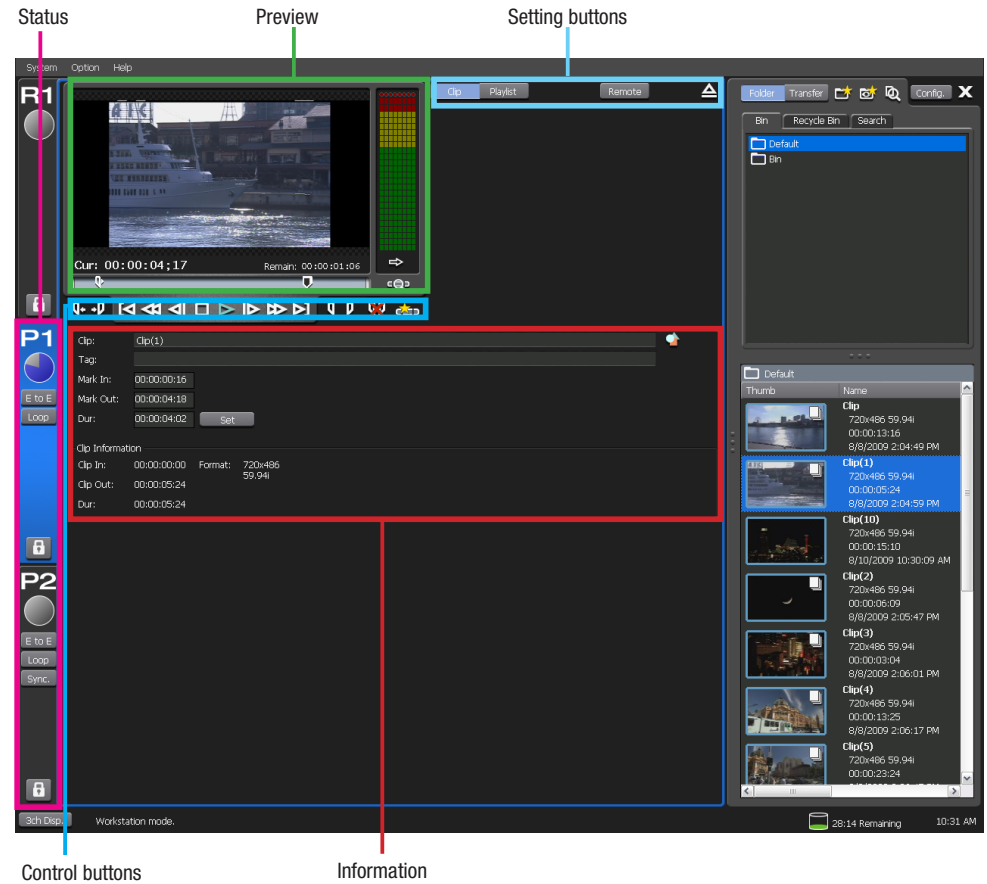

\*1 Available only when IN/OUT points are not set.

- In VTR mode, when both IN and OUT points are set, the range between the IN and OUT points will be recorded, controlling the VTR.
- In VTR mode, when only IN point is set, the recording starts from the specified IN point, controlling the VTR. (Recording must be stopped manually.)
- According to the type of the recording, the icon of the **Rec** button differs.

	Crash Rec	This icon indicates that recording must be stopped manually.
	Fixed Length Rec	This icon indicates that the Fixed Length mode is enabled.
	In-Out Rec	This icon indicates that the IN/OUT points are set.

## Full Display - ClipPlayer

On this screen, you can modify the settings for clip playback and/or execute the playback.

Status

Status	Displays the status of the playback operation with a circular chart.
Playback mode	<p><b>E to E</b> Displays whether the E to E mode is enabled. When the E to E mode is enabled, the recorder channel audio and video inputs are switched to the player channel audio and video outputs when the player channel is in stop mode or when there is no clip loaded. * The video format for the channel specified to <b>E to E mode</b> must be same as that of the R1 channel.</p> <p><b>Loop</b> Displays whether the Loop mode is enabled.</p> <p><b>Sync.</b> Displays whether the Sync mode is enabled. (Available only on P2 channel.)</p>
Lock button	Locks/Unlocks the channel.

## Preview

<b>Preview</b>	Displays the video preview.
<b>Audio level</b>	Displays the output audio level.
<b>Cur</b>	Displays the current timecode.
<b>Playback speed</b>	Displays the current playback speed (ratio).
<b>Remain</b>	Displays the remaining time by timecode.
<b>Scrub bar</b>	Displays the current position and the IN/OUT points.
<b>Zoom button</b>	<p>Changes the display scale on the scrub bar (Zoom On / Off).</p> <p><b>Zoom On</b> Displays the section between the IN-OUT points of the clip as a whole scale of the scrub bar. Moving the current point out of the IN-OUT range is not available.</p> <p><b>Zoom Off</b> Displays the entire media clip in a complete scale of the scrub bar. In the normal playback operations, the current position can be moved between the IN-OUT points. To move out of the existing IN-OUT range, perform FF, Rew, Jog/Shuttle operations after CueUp.</p>

## Setting buttons

<b>Switch mode button</b>	Switches the player mode between <b>Clip player</b> and <b>Playlist player</b> .
<b>Remote button</b>	Click this button to enable remote controls from the external device connected.
<b>Unload button</b>	Unloads the loaded clip.

## Control buttons

<b>Cue (IN)</b>	Cues to the existing IN point.
<b>Cue (OUT)</b>	Cues to the existing OUT point.
<b>Top button</b>	Cues to the top of the loaded content.
<b>Rew button</b>	While playing a clip Moves to the previous IN/OUT point, or the top of the clip. While playing a playlist Moves to the previous event.
<b>Previous Frame button</b>	Moves back frame by frame.
<b>Stop button</b>	Stops playback.
<b>Play button</b>	Starts playback.
<b>Next Frame button</b>	Moves forward frame by frame.
<b>FF button</b>	While playing a clip Moves to the next IN/OUT point, or the end of the clip. While playing a playlist Moves to the next event.
<b>End button</b>	Cues to the end of the loaded content.
<b>Mark (IN)</b>	Marks the current position as the IN point of the content. Marking an IN point will set the timecode of the IN point in the timecode box.
<b>Mark (OUT)</b>	Marks the current position as the OUT point of the content. Marking an OUT point will set the timecode of the OUT point in the timecode box, as well as the duration of the clip in the Length box.
<b>Clear button</b>	Clears the existing IN/OUT points.
<b>Creating sub-clip button</b>	Generates a sub-clip according to the existing IN/OUT points.

## Information

The screenshot shows a dark-themed interface with the following elements:

- Clip:** A text field containing "Clip 0001" and a small icon to its right.
- Tag:** An empty text field.
- Mark In:** A timecode input field showing "--:--:--".
- Mark Out:** A timecode input field showing "--:--:--".
- Dur:** A timecode input field showing "--:--:--" and a "Set" button to its right.
- Clip Information:** A section containing:
  - Clip In:** 00:00:00:00
  - Format:** 720x486 59.94i
  - Clip Out:** 00:00:20:19
  - Dur:** 00:00:20:19

<b>Clip</b>	Displays the name of the loaded clip.
<b>Tag</b>	Displays tags. You can also input tags.
<b>Mark In</b>	Displays the timecode at the IN point.
<b>Mark Out</b>	Displays the timecode at the OUT point.
<b>Dur</b>	Displays the duration of the content between the IN-OUT points by timecode.
<b>Set button</b>	Click the <b>Set</b> button to update the IN/OUT points of the content according to the existing IN/OUT points.
<b>Clip In</b>	Displays the timecode at the IN point of the clip.
<b>Clip Out</b>	Displays the timecode at the OUT point of the clip.
<b>Dur</b>	Displays the duration of the clip by timecode.

Preview – Right click menu

Set Thumbnail Frame	Choose this option to use the current frame as a thumbnail.
---------------------	---

Loading clip from Bin

To load a clip from the Bin, perform drag & drop, use the Bin menu, or double-click on a clip.

Loading clip which is being recorded (Follow-up playback)

To Load the clip which is being recorded on the R1 channel onto one of the playback channels, perform the loading operation on the clip registered to the Bin once a recording starts.

Adjusting IN/OUT points

Cue to the Mark IN/OUT points, and perform moving frame/FF/Rew operations to go out of the current IN-OUT range (The duration of the clip will be extended.)

## Sync mode

In the Sync mode, the clips that have been specified as **paired clips** in the Bin, can be loaded to the player channel. When a clip that has been paired is loaded onto the P1 channel, the other clip of the pair will automatically be loaded to the P2 channel.

When the Sync mode is activated, if the output settings of the P1 and P2 channels differ, the settings on the P2 channel are automatically changed so as to match those of the P1.

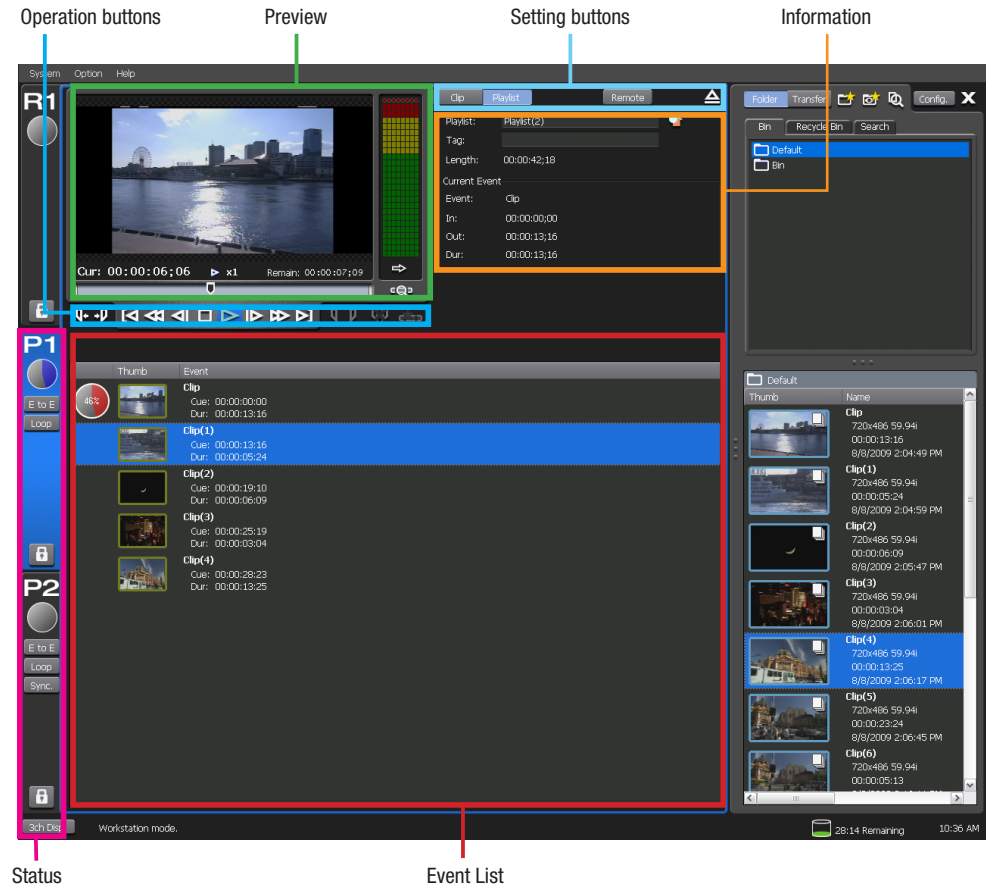

The E to E mode cannot be simultaneously activated.

In the Sync mode, only playback operations are available. Marking IN/OUT points or creating sub-clips is not available.

\* If the duration of the contents differs between P1 and P2 channels, the playback operations will be performed according to the P1 channel. (P1 channel is the master channel.) When the content loaded on the P2 channel is shorter, the final frame remains displayed.

## Full Display - PlaylistPlayer

In this screen, you can modify the playback settings for the playlist and/or execute the playback. The Event List will be automatically scrolled so that the clip being played is shown on screen. To enable/disable the auto-scroll for the Event List, click the **Config** button, open the **Miscellaneous** tab and change the **Playlist AutoScroll** setting (Default: ON).

## Status

<b>Status</b>	Displays the status of the playback operation with a circular chart.
<b>Playback mode</b>	<p><b>E to E</b> Displays whether the E to E mode is enabled. When the E to E mode is enabled, the recorder channel audio and video inputs are switched to the player channel audio and video outputs when the player channel is in stop mode or when there is no playlist loaded. * The video format for the channel specified to <b>E to E mode</b> must be same as that of the R1 channel.</p> <p><b>Loop</b> Displays whether the Loop mode is enabled.</p> <p><b>Sync.</b> Displays whether the Sync mode is enabled. (Available only on the P2 channel)</p>
<b>Lock button</b>	Locks/Unlocks the channel.

Preview

Preview	Displays the video preview.
Cur	Displays the current timecode.
Playback speed	Displays the current playback speed (ratio).
Remain	Displays the remaining time by timecode.
Scrub bar	Displays the current position and the IN/OUT points.
Zoom button	<p>Changes the display scale on the scrub bar (Zoom On / Off).</p> <p><b>Zoom On</b> Displays the section between the IN-OUT points of the clip as a whole scale of the scrub bar. Moving the current point out of the IN-OUT range is not available.</p> <p><b>Zoom Off</b> Displays the entire media clip in a complete scale of the scrub bar. In the normal playback operations, the current position can be moved between the IN-OUT points. To move out of the existing IN-OUT range, perform FF, Rew, Jog/Shuttle operations after CueUp.</p>

## 69

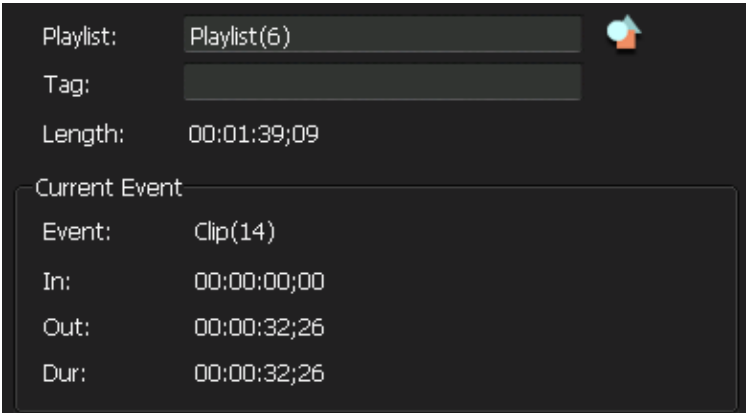

<b>Switch Mode button</b>	Switches the player mode between <b>Clip player</b> and <b>Playlist player</b> .
<b>Remote button</b>	Click this button to enable remote controls from the external device connected.
<b>Unload button</b>	Unloads the loaded playlist.

## Operation buttons

<b>Cue (IN)</b>	Cues to the top frame of the current event.
<b>Cue (OUT)</b>	Cues to the end frame of the current event.
<b>Previous Event button</b>	Cues to the previous event (IN point).
<b>Rew button</b>	Rewinds the loaded content.
<b>Previous Frame button</b>	Moves back frame by frame.
<b>Stop button</b>	Stops playback.
<b>Play button</b>	Starts playback.
<b>Next Frame button</b>	Moves forward frame by frame.
<b>FF button</b>	Fast-forward the loaded content.
<b>Next Event button</b>	Cues to the next event (IN point).
<b>Mark (IN)</b>	Marks the current position as the IN point of the content. Marking an IN point will set the timecode of the IN point in the timecode box. (Available only while editing)
<b>Mark (OUT)</b>	Marks the current position as the OUT point of the content. Marking an OUT point will set the timecode of the OUT point in the timecode box, as well as the duration of the clip in the Length box. (Available only while editing)
<b>Clear button</b>	Clears the existing IN/OUT points. (Available only while editing)
<b>Set button</b>	Click the <b>Set</b> button to update the IN/OUT points of the content according to the existing IN/OUT points. (Available only while editing)

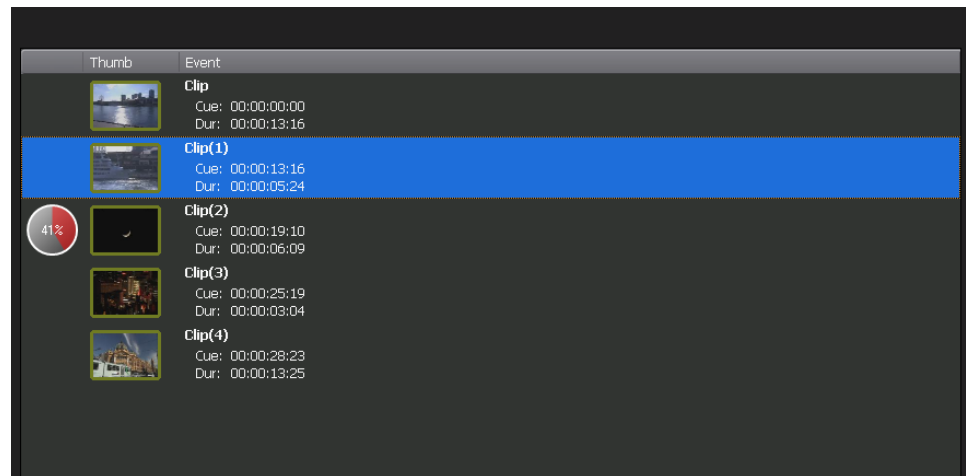

Information

<b>Playlist</b>	Displays the name of the loaded playlist.
<b>Tag</b>	Displays tags. You can also input tags.
<b>Length</b>	Displays the total length o the playlist.
<b>Event</b>	Displays the name of the event being played.
<b>In</b>	Displays the timecode at the IN point of the event being played.
<b>Out</b>	Displays the timecode at the OUT point of the event being played.
<b>Dur</b>	Displays the duration of the content between the IN-OUT points by timecode.

## Event List

Displays the list of the registered events and the playback status.

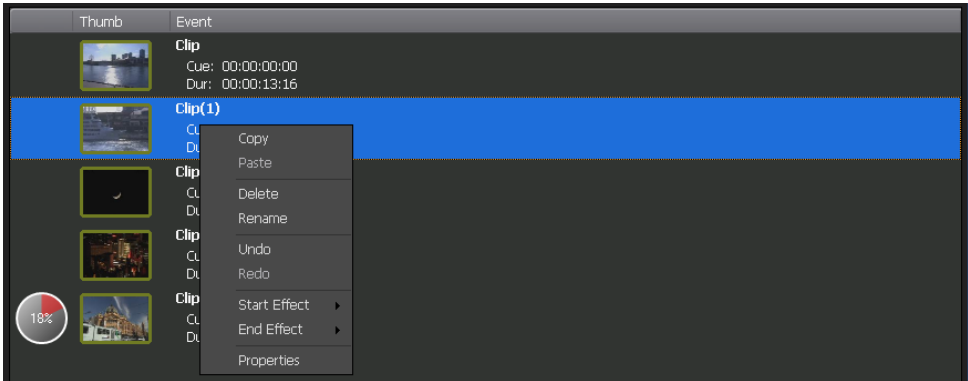

### Event List

Lists the events on the playlist.  
On the thumbnail of each event, icons for identifying its effect are displayed, if any.

\* If the End Effect (Pause, Loop) is set on the final event of the playlist, the loop setting on the channel is ignored, and the specified End Effect takes precedence.

Event List – Right click menu

Copy	opies the selected event (copies it to clipboard).
Paste	Pastes the content copied to clipboard.
Delete	Deletes the events from the Event List.
Rename	Changes the name of the selected event.
Undo	Undoes the previous editing operation.
Redo	Redoes the undo editing operation.
Start Effect	Specifies the Start Effect of the selected event.
End Effect	Specifies the End Effect of the selected event.
Properties	Displays the properties dialog of the selected event.

**Preview – Right click menu****Set Thumbnail Frame**

Choose this option to use the current frame as the thumbnail of the current event.

### Thumbnail icons

<b>Fade in icon</b>	Displayed on the contents where Fade In is set.
<b>Fade out icon</b>	Displayed on the contents where Fade Out is set.
<b>Pause icon</b>	Displayed on the contents where Pause is set for the End Effect.
<b>Loop icon</b>	Displayed on the contents where Loop is set for the End Effect.

### Creating a playlist

To create a playlist, drag & drop clip/playlist from the Bin to the Event List.

Cut, Copy, Paste and Delete operations are available on the Event List.

To change the order of the events on the playlist, drag & drop events on the Event List.

\* Up to 1000 events can be registered to a playlist. Note that at least one event is required on a playlist.

\* Double-clicking on an event will cue to the event.

### Sync mode

In the Sync mode, the playlists that have been specified as **paired playlists** in the Bin, can be loaded to the player channel. When a playlist that has been paired is loaded onto the P1 channel, the other playlist of the pair will automatically be loaded to the P2 channel.

When the Sync mode is activated, if the output settings of the P1 and P2 channels differ, the settings on the P2 channel are automatically changed so as to match those of the P1.

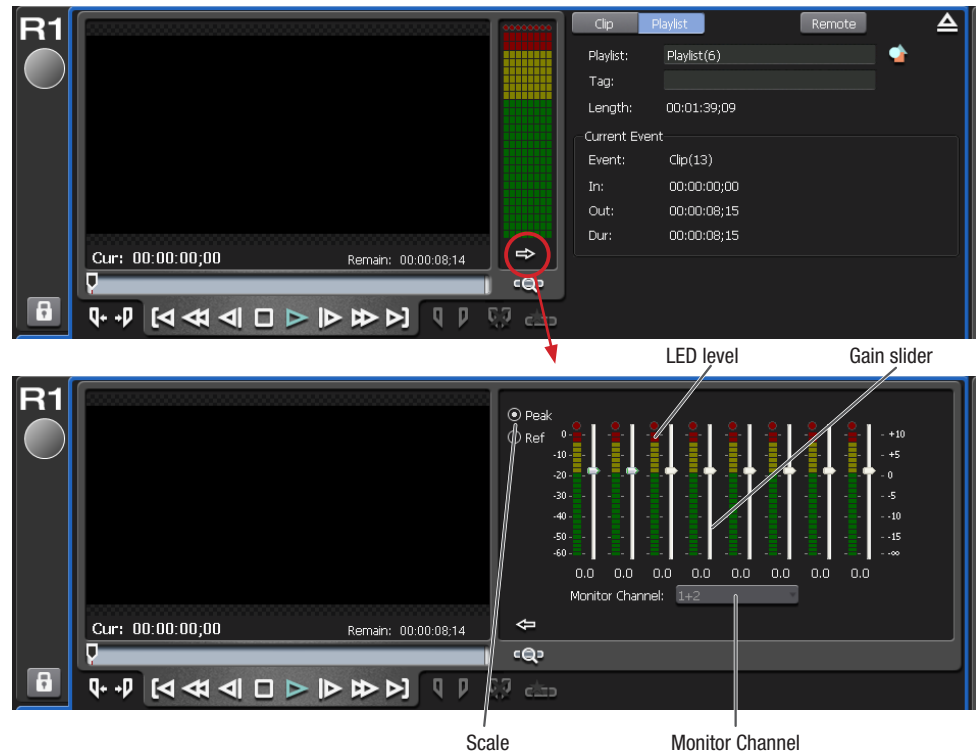

The **E to E mode** cannot be simultaneously activated.

In the Sync mode, only playback operations are available. Marking IN/OUT points or creating sub-clips is not available.

\* If the duration of the contents differs between P1 and P2 channels, the playback operations will be performed according to the P1 channel. (P1 channel is the master channel.) When the content loaded on the P2 channel is shorter, the final frame remains displayed.

## Audio Level

Clicking on the audio level area (arrow symbol) opens the Audio Level meter.

<b>Scale</b>	Switches the display scale. PEAK0 : -60dB to 0dB (Displays so that the maximum volume as 0dB; dBFS) REF0 : -40dB to +20dB (Displays the standard level (Headroom) as 0dB)
<b>LED level</b>	Displays the audio level (peak meter).
<b>Gain slider</b>	Adjust the gain for each channel. (Only ANA is available on the R1 channel) Range : $-\infty$ to +10dB
<b>Monitor Channel</b>	Choose a monitor channel for headphone jack. 1+2 / 3+4 / 5+6 / 7+8 are available for each R1/P1/P2 channel.

# Properties screen

## Clip properties

### Clip Info tab

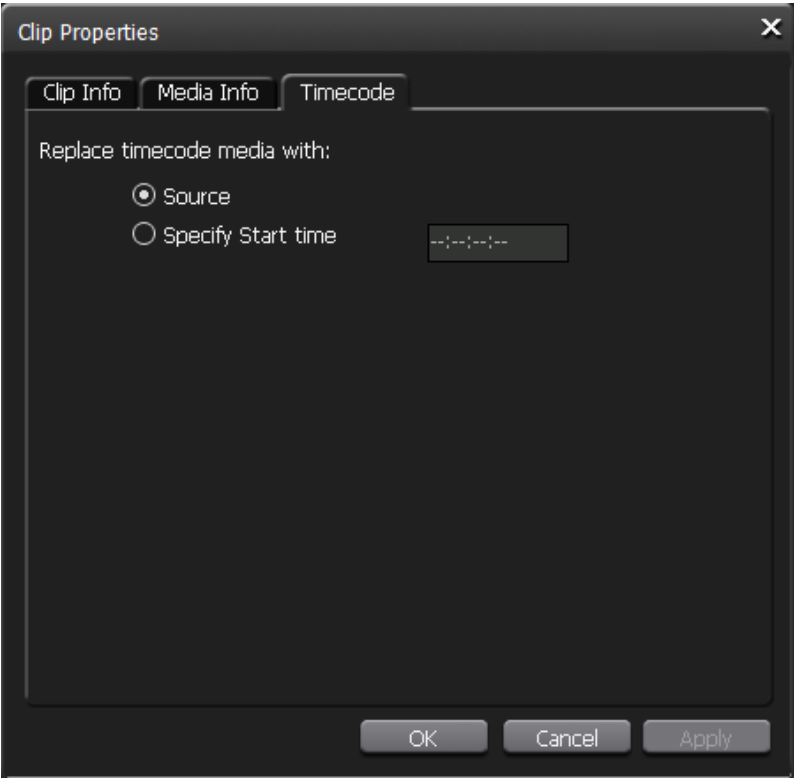

<b>Clip</b>	Displays the clip name. The clip name can be changed in this screen.
<b>Bin</b>	Displays the name of the Bin folder where the clip is registered.
<b>Video Format</b>	Displays the video format.
<b>Audio Format</b>	Displays the audio format.
<b>In TC</b>	Displays the timecode at the IN point.
<b>Out TC</b>	Displays the timecode at the OUT point.
<b>Duration</b>	Displays the duration of the clip.
<b>Reference</b>	Displays the number of the playlists that refer to the clip.
<b>Pairing</b>	Displays the clip name that is paired with this clip for the Sync mode.
<b>Created</b>	Displays the timestamp when the clip was created.
<b>Modified</b>	Displays the timestamp when the clip was updated.
<b>Locked</b>	Check this option to lock the clip.

## Media Info tab

<b>Location</b>	Displays the file name and the file path for the media file.
<b>Reference</b>	Displays the number of the playlists that refer to the media file. Click the <b>View</b> button to display the clips/playlists that refer to the media file.
<b>Size</b>	Displays the size of the media file.
<b>In TC</b>	Displays the timecode at the IN point.
<b>Out TC</b>	Displays the timecode at the OUT point.
<b>Duration</b>	Displays the duration of the media file.
<b>Created</b>	Displays the timestamp when the clip media file was created.
<b>Modified</b>	Displays the timestamp when the clip media file was updated.

Timecode tab

<b>Replace timecode media with</b>	Specifies the method to change the timecode. <b>Source</b> Check this option to replace with the timecode for the source. <b>Specify Start Time</b> Check this option to specify the starting timecode, and specify the value.
------------------------------------	--

## Playlist properties

### Playlist Info tab

<b>Playlist</b>	Displays the playlist name. The playlist name can be changed on this screen.
<b>Bin</b>	Displays the name of the Bin folder where the playlist is registered.
<b>Playlist Length</b>	Displays the duration of the playlist.
<b>Events</b>	Displays the number of events registered on the playlist.
<b>Reference</b>	Displays the number of the playlists that refer to this playlist.
<b>Created</b>	Displays the timestamp when the playlist was created.
<b>Modified</b>	Displays the timestamp when the playlist was updated.
<b>Locked</b>	Check this option to lock the playlist.

Timecode tab

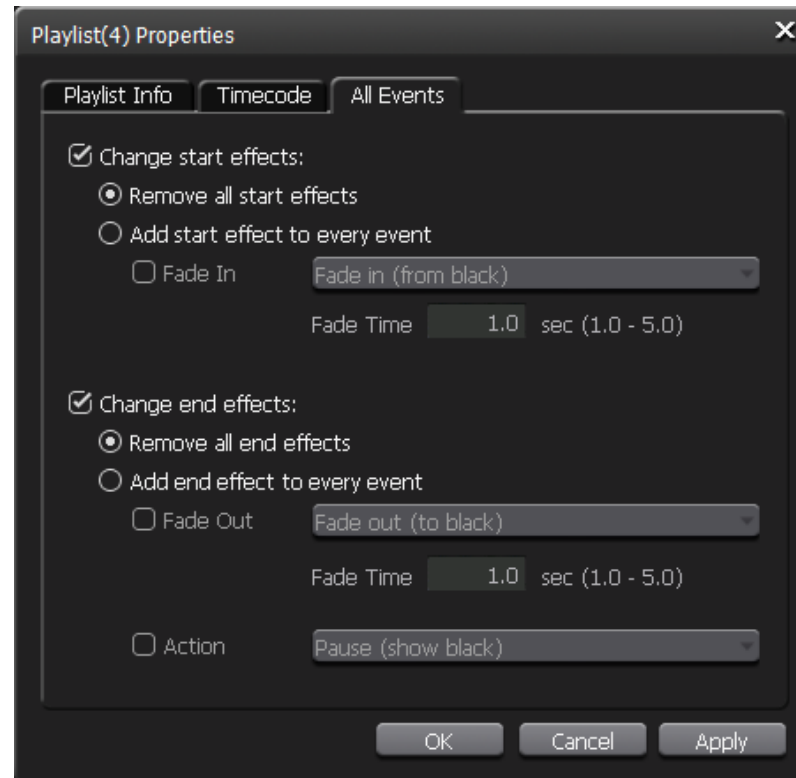

Start timecode at	Check this option to specify the starting timecode, and specify the value.
-------------------	--

## All Events tab

In this tab, the settings for all the events registered on the playlist can be modified globally.

### Change start effects

Check this option to change the start effect of the events.

#### Remove all start effects

Removes the start effects from all the events.

#### Add start effect to every event

Adds start effects to all the events.

#### Fade In

Adds fade in to all the events.

- Fade in (from black) .....Adds the fade in starting from a black screen.
- Fade in (from white) .....Adds the fade in starting from a white screen.

#### Fade Time

Specify the duration between the beginning and the end of the fade in.

<b>Change end effects</b>	<p>Check this option to change the end effect of the events.</p> <p><b>Remove all end effects</b> Removes the end effects from all the events.</p> <p><b>Add end effect to every event</b> Adds end effects to all the events.</p> <p><b>Fade Out</b> Adds fade out to all the events.</p> <ul style="list-style-type: none"><li>• Fade out (to black) .....Adds the fade out ending with a black screen.</li><li>• Fade out (to white) .....Adds the fade out ending with a white screen.</li></ul> <p><b>Fade Time</b> Specify the duration between the beginning and the end of the fade out.</p> <p><b>Action</b> Check this option to specify the action when the playback ends.</p> <ul style="list-style-type: none"><li>• Pause (show black) .....Pauses the playback with a black screen displayed.</li><li>• Pause (show white) .....Pauses the playback with a white screen displayed.</li><li>• Pause (last frame) .....Pauses the playback with the last frame displayed.</li><li>• Pause (next event).....Pauses the playback with the first frame of the next event displayed.</li><li>• Pause (show E to E).....Displays the video input to the R1 channel with active through.</li><li>• Loop.....Plays the selected event in loop.</li></ul>

## Event properties

### Event Info tab

Clip Properties (1/2)

Event Info GPI Start Effect End Effect

Event: Clip

Event In: 00:00:00:00

Event Out: 00:00:13:16

Duration: 00:00:13:16

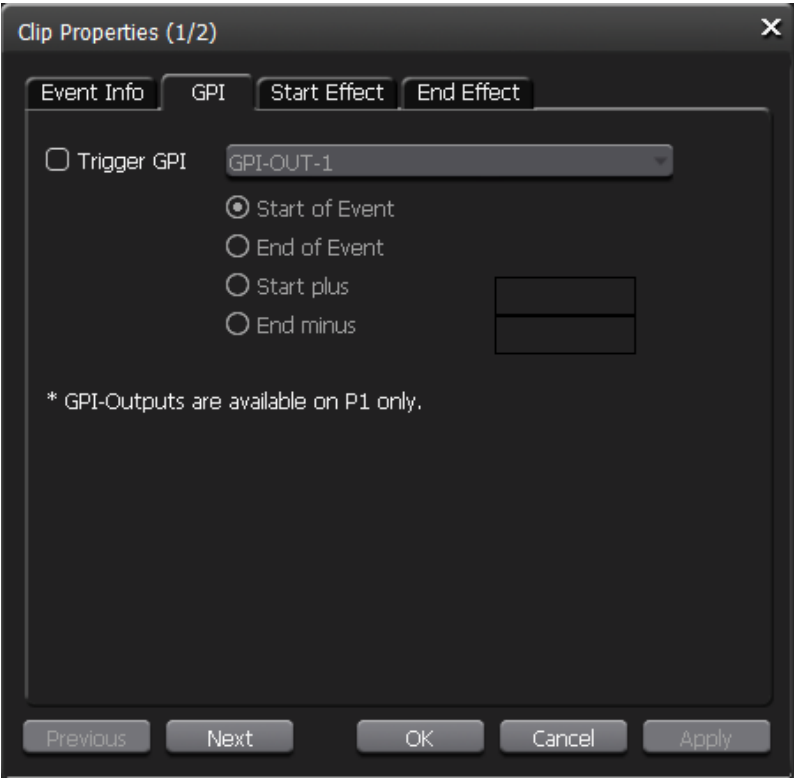

Type: Clip

Source Name: Clip

Previous Next OK Cancel Apply

<b>Event</b>	Displays the event name. The event name can be changed on this screen.
<b>Event In</b>	Displays the timecode at the IN point.
<b>Event Out</b>	Displays the timecode at the OUT point.
<b>Duration</b>	Displays the duration of the event.
<b>Type</b>	Displays the type of event (Clip or Playlist).
<b>Source Name</b>	Displays the clip name or the playlist name that the event refers to.

GPI tab

Trigger GPI	Choose the GPI trigger to specify setting.
Start of Event	Check this option to set the start of an event as a trigger.
End of Event	Check this option to set the end of an event as a trigger.
Start plus	Check this option to set a certain point from the top of an event as a trigger, and then specify the value.
End minus	Check this option to set a certain point before the end of an event as a trigger, and then specify the value.

## Start Effect tab

<b>Fade In</b>	<p>Check this option to add the fade in effect to the chosen event, and choose the effect.</p> <ul style="list-style-type: none"> <li>• Fade in (from black)..... Adds the fade in starting from a black screen.</li> <li>• Fade in (from white)..... Adds the fade in starting from a white screen.</li> </ul>
<b>Fade Time</b>	Specify the duration between the beginning and the end of the fade in.

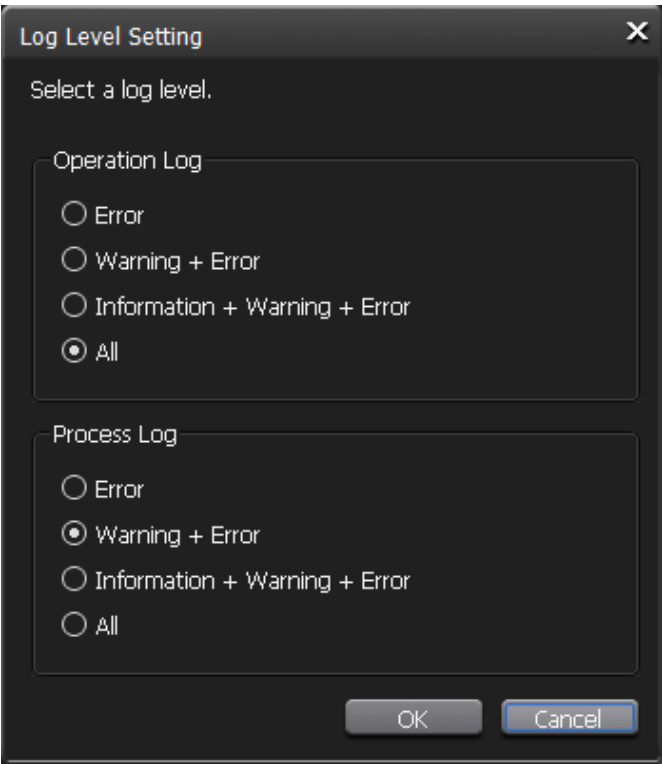

End Effect tab

<b>Fade Out</b>	<p>Check this option to add the fade out effect to the chosen event, and choose the effect.</p> <ul style="list-style-type: none"> <li>• Fade out (to black)..... Adds the fade out ending with a black screen.</li> <li>• Fade out (to white)..... Adds the fade out ending with a white screen.</li> </ul>
<b>Fade Time</b>	Specify the duration between the beginning and the end of the fade out.
<b>Action</b>	<p>Specify the action when the event comes to an end.</p> <ul style="list-style-type: none"> <li>• Pause (show black)..... Pauses the playback with a black screen displayed.</li> <li>• Pause (show white)..... Pauses the playback with a white screen displayed.</li> <li>• Pause (last frame) ..... Pauses the playback with the last frame displayed.</li> <li>• Pause (next event) ..... Pauses the playback with the first frame of the next event displayed.</li> <li>• Pause (show E to E)..... Displays the video input to the R1 channel with active through.</li> <li>• Loop..... Playbacks the selected event in loop.</li> </ul>

# Log Level Setting

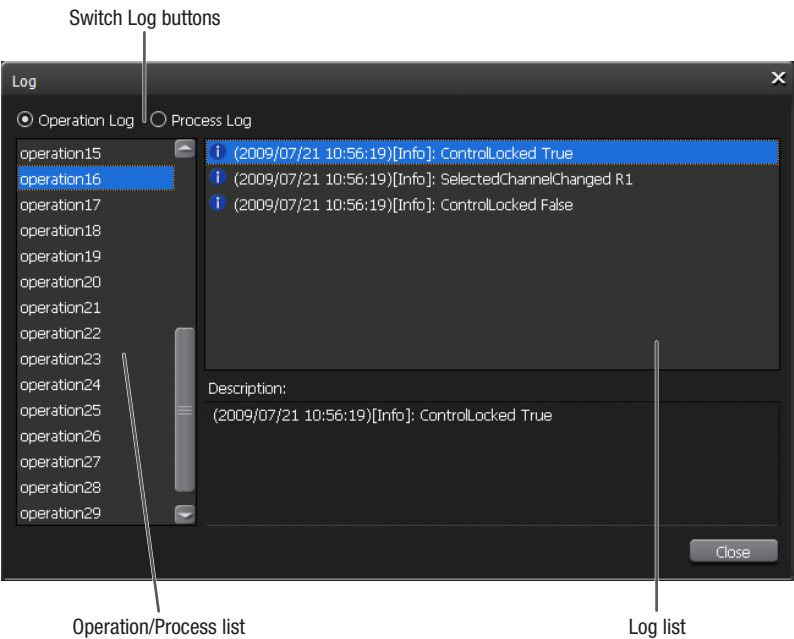

Select a log level on this screen.

Operation Log	<p>Choose the type of the operation log.</p> <p><b>Error</b> Only error logs are output.</p> <p><b>Warning + Error</b> Warning and error logs are output.</p> <p><b>Information + Warning + Error</b> Information, warning and error logs are output.</p> <p><b>All</b> All the logs are output.</p>
Process Log	<p>Choose the type of the process log.</p> <p><b>Error</b> Only error logs are output.</p> <p><b>Warning + Error</b> Warning and error logs are output.</p> <p><b>Information + Warning + Error</b> Information, warning and error logs are output.</p> <p><b>All</b> All the logs are output.</p>

# Log

This screen displays the logs.

Switch Log buttons	Choose the log to display between <b>Operation Log</b> and <b>Process Log</b> .
Operation/Process list	Lists the operations/processes.
Log list	Lists the logs.
Description	Displays the description of the log.

# *APPENDIX*

## T2 Hardware specifications

PC interface USB	USB		USB2.0 x2 (front), x6 (rear)
	IEEE1394		IEEE1394a x1 (front), x1 (rear), Up to 12V , 1A of bus power (total for both ports)
	PS/2		Mini DIN 6pin x2
	Display		Analog RGB D-SUB 15pin x1
	Serial		RS232C D-SUB 9pin x1 (Not used)
	LAN		RJ-45 Network connector x2, 10BASE-T/100BASE-TX/1000BASE-T
	Sound		Stereo mini jack x6 (Not used)
Removable media			DVD-ROM x1
			2.5 inched removable drive bay x1 (RAID/SSD model)
Video signal	Input	SDI	1 line, BNC x2 (Active through x1)
		DVI-I	1 line, DVI-I x1. The analog sections are also for YPbPr. (DVI-D does not support HDCP.)
		Composite	1 line, BNC x1
	Output	SDI	2 lines, BNC x2
		DVI-I	2 lines. The analog sections are also for RGB/YPbPr.
		Composite	2 lines, BNC x2
		Monitor	Composite, 2 lines, BNC x2
Audio signal	Input	Balanced audio	1 line, XLR-3-31 x2, Up to 24dBu
		Digital audio	1 line, AES/EBU BNC x1
	Output	Balanced audio	2 lines, XLR-3-32 x4
		Digital audio	1 line, AES/EBU, 2 lines, BNC x2
		Headphones	Stereo jack x1
		Monitor line	Stereo mini jack x1
Timecode	Input	LTC	1 line, BNC x1
	Output	LTC	2 lines, BNC x2
REF in			HD tri-level, BB compatible, BNC x2 (throughout x1)
Remote	GPI I/O		D-SUB 15pin x1, 6 input, 6 output pins.
	RS422		3 lines, D-SUB 9pin x3 (each one of the lines correspond to the R1, P1 or P2 channel)
Power supply			AC 100V - 240V, 50/60Hz
Power consumption			2.5A - 1.1A
Dimensions			430(W) x 132(H) x 550.8(D) (Projecting parts not included)
Weight			15kgf approximately
Operating temperature			+5 to +35 degrees C
Operating humidity			10% to 80% (Without condensation)

# Supported resolutions

Profile	Available format for loading	Available video port	Conversion mode for PC		Output to monitor	R1 input, REF input signal for Sync mode
			DVI-D	DVI-A (RGB)		
720×486 59.94i	720×486 59.94i 720×480 59.94i (DVD) 720×480 59.94i (DV)	SDI Component Composite	×	×	NTSC	720×480 59.94i

1280×720 24p	960×720 24p	SDI Component	×	×	×	1280×720 24p (REF in only)
1280×720 23.98p	1280×720 23.98p 960×720 23.98p	SDI Component	×	×	×	1280×720 23.98p (REF in only)

\*1 Can be specified to 1920 x 1080p 59.94.

\*2 Can be specified to 1920 x 1080p 50.

\*3 As the playback of channels is synchronized with paired frames, the sync mode is not available in 3Sync phase

PC Can be specified to VGA, SVGA, XGA, or SXGA.

Note 1 Component and DVI-A (RGB) cannot be used simultaneously.

Note 2 DVI-I and DVI-A outputs in PC conversion mode cannot be used for Sync mode.

Note 3 When the aspect ratios of the source and the profile differ, a black bar is added to the top/bottom or left/right sides.

Note 4 The DVI/RGB signal is output with a certain delay from the SDI/YPbPr output.

# GPI I/O connector pinouts

Pin	Signal
1	Output 1
2	Output 2
3	Output 3
4	Output 4
5	Output 5
6	Output 6
7	NC
8	Common Ground

Pin	Signal
9	Input 1
10	Input 2
11	Input 3
12	Input 4
13	Input 5
14	Input 6
15	NC
SHELL	Common Ground

**Note** T2 iDDR software supports outputs 1-6 and inputs 1-6 only. Pin 7 and Pin 15 are not used.
